

ACI Worldwide and Integrated Research Launch Payment Service Management for Fraud Prevention

Manage availability and performance of ACI Proactive Risk Manager

(New York, N.Y. – 8 February 2011) – ACI Worldwide, Inc. (Nasdaq: ACIW), a leading international provider of payment systems, and Integrated Research (ASX: IRI), developer of market-leading Prognosis® performance monitoring solutions, today launched Prognosis for ACI Proactive Risk Manager™. The solution will help financial institutions using ACI's flagship fraud management product to continually monitor and manage their fraud systems in real time.

The launch of Prognosis for ACI Proactive Risk Manager follows last year's announcement of the partnership between ACI Worldwide and Integrated Research to offer ACI Payment Service Management™ powered by Prognosis, currently available for ACI's BASE24-eps® and BASE24® payment processing environments.

Prognosis for ACI Proactive Risk Manager offers real time monitoring functionality for Proactive Risk Manager to ensure the availability and stable system performance of the application and its underlying hardware and network infrastructure. By monitoring the system transaction throughput, financial institutions will be able to improve resource productivity and fraud detection capabilities, and increase operational efficiencies.

Louis Blatt, chief product officer at ACI Worldwide said, "Payment Service Management helps business and operations personnel understand how the financial institution's payments business is performing at every level. Extending this functionality to continually monitor the performance of ACI's fraud management solution can deliver even greater improvements in detection rates and speed."

Mark Brayan, CEO from Integrated Research said, "The launch of Prognosis for Proactive Risk Manager was the natural next step following the announcement of the formal partnership between our two companies. The visibility that the Prognosis solutions already deliver across BASE24-eps and BASE24 systems is making a real difference within financial institutions of all sizes, around the world, and we are delighted that we can extend this offering even further."
