

## **Aite and Celent Recognize ACI Enterprise Banker for Breadth of Capabilities**

(New York, N.Y. – 14 September 2009) – ACI Worldwide, Inc. (Nasdaq: ACIW), leading international provider of electronic payments software and solutions, today announced that its online banking solution, ACI Enterprise Banker™, has been recognized by both Celent and Aite in recent reports. Aite gave the product the highest score for functionality in its report, “An Evaluation of Leading U.S. Cash Management Vendors,” and Celent gave it high marks for breadth of features in its report, “The Next Generation of Online Corporate Cash Management Solutions.”

ACI was the only vendor to be able to deliver all functionality identified by Aite as important for cash management solutions, including cash position worksheet and multibank reporting. It also scored highly for solution usability, and was recognized as one of the vendors offering the greatest depth of cash management functionality to the market. For Celent, Enterprise Banker scored especially well for usability, dashboard, and user administration, and ACI was recognized as a significant player in the space based on the number of live customers.

Louis Blatt, chief product officer at ACI Worldwide said, “These recent reports acknowledge the depth of features and functionality of Enterprise Banker, alongside the product’s reliability. Both analyst firms highlight the growing importance of online banking to financial institutions and their customers, and it is clear that Enterprise Banker can meet those needs. Also mentioned in the report was Enterprise Banker’s unique ability to service small business and middle market, which has been widely adopted by our customers.”

ACI Enterprise Banker enables North American financial institutions to package products and services uniquely for individual markets or customer segments, and even specific customers from a single, flexible platform. It offers a full range of functionality including balance and transaction reporting; ACH and wire transfer origination and reporting; remote check deposit; bill presentment and payment; and cash concentration.
