ACI Worldwide Receives "Success in Large-Bank Market" Award in Aite Group Cash Management Report

(New York, N.Y. – April 4, 2011)– ACI Worldwide (Nasdaq: ACIW), a leading international provider of payment systems, today announced that its flagship online banking solution, ACI Enterprise Banker, has received the “Success in Large-Bank Market” Award by leading industry analyst firm, Aite in its latest report, “U.S. Cash Management Vendors: The Road to Meeting New Market Expectations.” ACI was also recognized as a market share leader with the biggest number of large U.S financial institutions live on Enterprise Banker, with 40% more implementations than the nearest competitor.

In the report Aite states, “ACI’s success in the market is a true testament to the sophistication of its functionality and proven track record in meeting the needs of large corporations. Recent enhancements to the solution and its customer dashboard now make this solution not only robust in functionality, but also easy for small businesses to use and navigate.”

Additionally, the report went on to state that, “As a result of recent enhancements, customers now feel they can get most of the information they need through a single click. The vendor seems further along than some of its competitors in its creation of widgets, and offers users easy-to-personalize customer dashboard design. Overall, the solution continues to differentiate itself as a strong offering with robust capabilities sophisticated enough for the largest corporations while incorporating a user interface and simplified workflows for micro businesses.”

Louis Blatt, chief product officer at ACI Worldwide said, “The results of the Aite study confirm that ACI retains its market leading position with a substantial number of existing deployments in large banks, as well as the volume of new client implementations in the large-bank space. Financial institutions of all sizes currently utilize Enterprise Banker to deliver online banking solutions to their customers across a spectrum of sophistication and size from large corporations to small and micro-businesses, and even consumers. We see the product being selected again and again for its reliability and functionality, and the fact that it is truly proven in the market.”

ACI Enterprise Banker allows financial institutions across North America to uniquely package products and services for different markets — or even individual customers — from a single, flexible platform. Enterprise Banker offers a full range of functionality including balance and transaction reporting; ACH and wire transfer origination and reporting; remote check deposit; bill presentment and payment; and cash concentration. The product is regularly updated, to deliver the functionality that banks need and stay ahead of their business requirements. Enterprise Banker can be licensed to operate on premise or delivered as a hosted service through ACI On Demand.
