EXPLANATORY NOTE: This quarterly report on Form 10-Q/A is being filed for the purpose of amending our consolidated financial statements to provide users of our financial information with additional information relative to adjustments recorded during the first quarter of 2008. On February 10, 2009, we determined that it was appropriate to restate previously issued consolidated financial statements to record these adjustments.

As described in Note 2 of the consolidated financial statements, ACI Worldwide, Inc. has restated its previously filed consolidated financial statements as of September 30, 2008 and for the nine month period ended September 30, 2008 included in its Quarterly Report on Form 10-Q for the quarter ended September 30, 2008, which was filed with the Securities and Exchange Commission (“SEC”) on November 7, 2008. We identified errors in our financial statements related to \$1.9 million in revenue recognized during the three months ended March 31, 2008 for a specific software project in the Asia/Pacific reportable operating segment that should have been deferred until further project milestones were achieved. In addition, \$0.4 million in expenses should have been deferred related to the same software project. The income tax effect of these errors was approximately \$0.1 million. The Audit Committee of our board of directors conducted and has since concluded a review and investigation of this matter.

As a result of the errors referred to above, the net loss for the nine month period ended September 30, 2008 was understated by \$1.4 million.

This amendment represents the 2008 Third Quarter Form 10-Q, as amended, in its entirety, but does not modify or update the disclosures in the 2008 Third Quarter Form 10-Q in any way other than as required to reflect the changes discussed above and does not reflect events occurring after the original filing of the 2008 Third Quarter Form 10-Q on November 7, 2008.

All information contained in this Form 10-Q/A is subject to updating and supplementing as provided in our reports filed with the SEC subsequent to the date of the original filing. As a result, we recommend that this Form 10-Q/A be read in conjunction with all other periodic and current reports of the Company filed under the Securities Exchange Act of 1934, as amended, after the filing of the original Form 10-Q, including without limitation the information described in Note 2 to the consolidated financial statements included in this Form 10-Q/A.

ACI WORLDWIDE, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(unaudited and in thousands, except per share amounts)

1. Consolidated Financial Statements

The unaudited consolidated financial statements include the accounts of ACI Worldwide, Inc. (“the Company”) and its wholly-owned subsidiaries. All significant intercompany balances and transactions have been eliminated. The consolidated financial statements at September 30, 2008 and December 31, 2007, and for the three and nine months ended September 30, 2008 and 2007, are unaudited and reflect all adjustments of a normal recurring nature, except as otherwise disclosed herein, which are, in the opinion of management, necessary for a fair presentation, in all material respects, of the financial position and operating results for the interim periods.

The consolidated financial statements contained herein should be read in conjunction with the consolidated financial statements and notes thereto, together with management’s discussion and analysis of financial condition and results of operations, contained in the Company’s annual report on Form 10-K for the fiscal year ended September 30, 2007, as amended by the Form 10-K/A for the same period filed March 4, 2008.

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Change in Fiscal Year End

Effective January 1, 2008, the Company changed its fiscal year end from September 30 to December 31. The Company’s new fiscal year commenced January 1, 2008 and will end on December 31, 2008. This quarterly report on Form 10-Q compares the financial position as of September 30, 2008 to December 31, 2007 and September 30, 2007 and the results of operations for the three and nine months ended September 30, 2008 with the results of operations for the three and nine months ended September 30, 2007. The Company changed its fiscal year end to align its sales contracting and delivery processes with its customers and to allow for more effective communication with the capital markets and investment community by being consistent with its peer group.

When SFAS No. 142, *Goodwill and Other Intangible Assets*, was issued in 2001, the Company adopted the end of its fiscal year (or September 30) as its annual impairment testing date. As a result of the change in the Company’s fiscal year, it evaluated its annual goodwill impairment testing date and concluded to change its impairment testing date to October 1st versus the end of its new fiscal year. An October 1st testing date will allow the Company additional time to accurately complete its impairment testing process in order to incorporate the results in its annual financial statements and timely file those statements with the Securities Exchange Commission in accordance with its accelerated filing requirements.

Acquisitions

Visual Web Solutions, Inc.

On February 7, 2007, the Company acquired Visual Web Solutions, Inc. (“Visual Web”), a provider of international trade finance and web-based cash management solutions, primarily to financial institutions in the Asia/Pacific region. These solutions complement and have been integrated with the Company’s U.S.-centric cash management and online banking solutions to create a more complete international offering. Visual Web had wholly-owned subsidiaries in Singapore for sales and customer support and in Bangalore, India for product development and services.

The consolidated financial statements as of September 30, 2007 and for the nine months then ended include amounts acquired from, as well as the results of operations of, Visual Web from February 7, 2007 forward. The consolidated financial statements as of September 30, 2008, December 31, 2007, and September 30, 2007, and for the three and nine months ended September 30, 2008 include amounts acquired from, as well as the results of operations of, Visual Web.

[Table of Contents](#)

The aggregate purchase price of Visual Web, including direct costs of the acquisition, was \$8.3 million, net of \$1.1 million of cash acquired. Under the terms of the acquisition, the parties established a cash escrow arrangement in which \$1.1 million of the cash consideration paid at closing is held in escrow as security for tax and other contingencies. The allocation of the purchase price to specific assets and liabilities was based, in part, upon outside appraisals of the fair value of certain assets.

On April 2, 2007, the Company acquired Stratasoft Sdn Bhd (“Stratasoft”), a Malaysian-based provider of electronic payment solutions. Prior to the acquisition, Stratasoft had been a distributor of our OCM24 product within the Malaysian market since 1995. This acquisition compliments the Company’s strategy to move to a direct sales model in selected markets in Asia.

The consolidated financial statements as of September 30, 2008, December 31, 2007, and September 30, 2007, and for the three and nine months ended September 30, 2008, include amounts acquired from, as well as the results of operations of, Stratasoft.

The aggregate purchase price of Stratasoft, including direct costs of the acquisition, was \$2.5 million, net of \$0.7 million of cash acquired. The allocation of the purchase price to specific assets and liabilities was based, in part, upon outside appraisals of the fair value of certain assets.

The Company will pay an additional aggregate amount of up to \$0.6 million (subject to foreign currency fluctuations) to the sellers if Stratasoft achieves certain financial targets set forth in the purchase agreement for the period ended December 31, 2007 and the period ending December 31, 2008. During the nine months ended September 30, 2008, the Company completed the assessment for the period ended December 31, 2007 and determined that Stratasoft did not meet the financial targets set forth in the purchase agreement.

Under the terms of the acquisition, the parties established a cash escrow arrangement in which \$0.5 million of the cash consideration paid at closing is held in escrow as security for tax and other contingencies.

Lease Termination

During the nine months ended September 30, 2008, the Company terminated the lease for one of its facilities in Watford, England. Pursuant to the termination agreement, the Company paid a termination fee of approximately \$0.9 million that was recorded in general and administrative expenses in the accompanying consolidated statement of operations for the nine months ended September 30, 2008. Further under the termination agreement, the Company was relieved of its contractual obligations with respect to the restoration of facilities back to their original condition. As a result, the Company recognized a gain of approximately \$1.0 million related to the relief from this liability, which is also recorded in general and administrative expenses in the accompanying consolidated statement of operations. At September 30, 2008, December 31, 2007 and September 30, 2007, the Company had contractual obligations with respect to the restoration of leased facilities of \$1.5 million, \$2.5 million and \$2.6 million, respectively, recorded in other liabilities in the accompanying consolidated balance sheets.

Recently Issued Accounting Standards

In December 2007, the Financial Accounting Standards Board (“FASB”) issued Statement of Financial Accounting Standards (“SFAS”) No. 141(R), *Business Combinations* (“SFAS 141(R)”), which replaces SFAS 141. SFAS 141(R) establishes principles and requirements for how an acquirer in a business combination recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any controlling interest; recognizes and measures the goodwill acquired in the business combination or a gain from a bargain purchase; and determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. SFAS 141(R) is to be applied prospectively to business combinations for which the acquisition date is on or after an entity’s fiscal year that begins after December 15, 2008. The Company will assess the impact of SFAS 141(R) if and when a future acquisition occurs.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements – an amendment of ARB No. 51* (“SFAS 160”). SFAS 160 establishes new accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. Specifically, this statement requires the recognition of a noncontrolling interest (minority interest) as equity in the consolidated financial statements and separate from the parent’s equity. The amount of net income (loss) attributable to the noncontrolling interest will be included in consolidated net income (loss) on the face of the statement of operations. SFAS 160 clarifies that changes in a parent’s ownership interest in a subsidiary that do not

Table of Contents

result in deconsolidation are equity transactions if the parent retains its controlling financial interest. In addition, this statement requires that a parent recognize a gain or loss in net income (loss) when a subsidiary is deconsolidated. Such gain or loss will be measured using the fair value of the noncontrolling equity investment on the deconsolidation date. SFAS 160 also includes expanded disclosure requirements regarding the interests of the parent and its noncontrolling interest. SFAS 160 is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. Earlier adoption is prohibited. The Company is currently evaluating the impact, if any, the adoption of SFAS 160 will have on its consolidated financial statements.

In February 2008, the FASB issued FASB Staff Position (“FSP”) Financial Accounting Standard (“FAS”) 157-2, *Effective Date of FASB Statement No. 157*. FSP FAS 157-2 delays the effective date of SFAS No. 157 from 2008 to 2009 for all nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually).

On March 19, 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities*, (“SFAS 161”). SFAS 161 amends FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, (“SFAS 133”) and was issued in response to concerns and criticisms about the lack of adequate disclosure of derivative instruments and hedging activities. SFAS 161 requires (i) qualitative disclosures regarding the objectives and strategies for using derivative instruments and engaging in hedging activities in the context of an entity’s overall risk exposure, (ii) quantitative disclosures in tabular format of the fair values of derivative instruments and their gains and losses, and (iii) disclosures about credit-risk related contingent features in derivative instruments. SFAS 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, but early application is encouraged. The Company is currently evaluating the impact, if any, the adoption of SFAS 161 will have on its consolidated financial statements.

In May 2008, the FASB issued SFAS No. 162, *The Hierarchy of Generally Accepted Accounting Principles*. SFAS 162 identifies the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental entities that are presented in conformity with generally accepted accounting principles in the United States. It is effective 60 days following the SEC’s approval of the Public Company Accounting Oversight Board amendments to AU Section 411, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles*. The adoption of this statement is not expected to have a material effect on the Company’s financial statements.

In June 2008, the FASB issued FSP EITF 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities* (FSP EITF 03-6-1). FSP EITF 03-6-1 clarified that all outstanding unvested share-based payment awards that contain rights to nonforfeitable dividends participate in undistributed earnings with common shareholders. Awards of this nature are considered participating securities and the two-class method of computing basic and diluted earnings per share must be applied. FSP EITF 03-6-1 is effective for fiscal years beginning after December 15, 2008. The adoption of this standard will not have a material impact on the Company's consolidated financial position and results of operations.

In October 2008, the FASB issued Staff Position No. FAS 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset is Not Active* (FSP 157-3). FSP 157-3 clarifies the application of SFAS 157, which the Company adopted as of January 1, 2008, in cases where a market is not active. The Company has considered the guidance provided by FSP 157-3 in its determination of estimated fair values of financial assets as of September 30, 2008, and the impact was not material.

[Table of Contents](#)

2. Restatement

As a result of an error identified in our financial statements, we have restated our previously filed consolidated financial statements as of September 30, 2008 and for the nine-month period ended September 30, 2008. We have determined that \$1.9 million in revenue recognized during the nine months ended September 30, 2008 for a specific software project in the Asia/Pacific reportable operating segment should have been deferred until further project milestones were achieved. In addition, \$0.4 million in expenses should have been deferred related to the same software project. The income tax effect of these errors was approximately \$0.1 million.

Summary of restatement items for the nine-month period ended September 30, 2008:

	<u>Adjustments</u>
Net loss as originally recorded	\$ (915)
Error in revenue recognition (A)	(1,928)
Deferred expense recognition (B)	364
Income tax effect of revenue and deferred expense adjustments (C)	123
Net loss as adjusted	<u>\$ (2,356)</u>

Errors in previously issued financial statements were identified in the following areas:

(A) Revenue

During the nine-month period ended September 30, 2008, we recognized \$1.9 million in revenue related to a specific software project that should have been deferred until additional project milestones were achieved.

(B) Deferred expense recognition

During the nine-month period ended September 30, 2008, \$0.4 million of costs related to the performance of the services revenue recognized related to the specific software project discussed above were expensed. As the associated revenues have now been determined to be deferred, direct and incremental costs related to the performance of these services revenues are also being deferred.

(C) Taxes

Represents adjustments to tax effect the revenue and deferred expense recognition adjustments discussed in (A) and (B) above.

The following items in the Consolidated Balance Sheet, Consolidated Statement of Operations and Consolidated Statement of Cash Flows have been restated as follows based on the items noted above.

[Table of Contents](#)

<u>Consolidated Balance Sheet</u>	<u>As previously reported</u>	<u>As restated</u>
Recoverable income taxes	\$ 9,998	\$ 10,121
Other current assets	8,249	8,613
Total current assets	224,256	224,743
Total assets	558,326	558,813
Deferred revenue (current)	105,370	107,298

Net cash flows from investing activities	(14,351)	(14,351)
Net cash flows from financing activities	(27,719)	(27,719)

3. Revenue Recognition, Accrued Receivables and Deferred Revenue

Software License Fees. The Company recognizes software license fee revenue in accordance with American Institute of Certified Public Accountants (“AICPA”) Statement of Position (“SOP”) 97-2, *Software Revenue Recognition* (“SOP 97-2”), SOP 98-9, Modification of SOP 97-2, *Software Revenue Recognition With Respect to Certain Transactions* (“SOP 98-9”), and Securities and Exchange Commission (“SEC”) Staff Accounting Bulletin (“SAB”) 101, *Revenue Recognition in Financial Statements*, as codified by SAB 104, *Revenue Recognition*. For software license arrangements for which services rendered are not considered essential to the functionality of the software, the Company recognizes revenue upon delivery, provided (1) there is persuasive evidence of an arrangement, (2) collection of the fee is considered probable and (3) the fee is fixed or determinable. In most arrangements, vendor-specific objective evidence (“VSOE”) of fair value does not exist for the license element; therefore, the Company uses the residual method under SOP 98-9 to determine the amount of revenue to be allocated to the license element. Under SOP 98-9, the fair value of all undelivered elements, such as post contract customer support (“maintenance” or “PCS”) or

[Table of Contents](#)

other products or services, is deferred and subsequently recognized as the products are delivered or the services are performed, with the residual difference between the total arrangement fee and revenues allocated to undelivered elements being allocated to the delivered element.

When a software license arrangement includes services to provide significant modification or customization of software, those services are not separable from the software and are accounted for in accordance with Accounting Research Bulletin (“ARB”) No. 45, *Long-Term Construction-Type Contracts* (“ARB No. 45”), and the relevant guidance provided by SOP 81-1, *Accounting for Performance of Construction-Type and Certain Production-Type Contracts* (“SOP 81-1”). Accounting for services delivered over time (generally in excess of twelve months) under ARB No. 45 and SOP 81-1 is referred to as contract accounting. Under contract accounting, the Company generally uses the percentage-of-completion method. Under the percentage-of-completion method, the Company records revenue for the software license fee and services over the development and implementation period, with the percentage of completion generally measured by the percentage of labor hours incurred to-date to estimated total labor hours for each contract. For those contracts subject to percentage-of-completion contract accounting, estimates of total revenue and profitability under the contract takes into consideration amounts due under extended payment terms. In certain cases, the Company provides its customers with extended payment terms whereby payment is deferred beyond when the services are rendered. In other projects, the Company provides its customer with extended payment terms that are refundable in the event certain milestones are not achieved or the project scope changes. The Company excludes revenues due on extended payment terms from its current percentage-of-completion computation until such time that collection of the fees becomes probable. In the event project profitability is assured and estimable within a range, percentage-of-completion revenue recognition is computed using the lowest level of profitability in the range. If the range of profitability is not estimable but some level of profit is assured, revenues are recognized to the extent direct and incremental costs are incurred until such time that project profitability can be estimated. In the event some level of profitability cannot be reasonably assured, completed-contract accounting is applied. If it is determined that a loss will result from the performance of a contract, the entire amount of the loss is recognized in the period in which it is determined that a loss will result.

For software license arrangements in which a significant portion of the fee is due more than 12 months after delivery, the software license fee is deemed not to be fixed or determinable. For software license arrangements in which the fee is not considered fixed or determinable, the software license fee is recognized as revenue as payments become due and payable, provided all other conditions for revenue recognition have been met. For software license arrangements in which the Company has concluded that collection of the fees is not probable, revenue is recognized as cash is collected, provided all other conditions for revenue recognition have been met. In making the determination of collectibility, the Company considers the creditworthiness of the customer, economic conditions in the customer’s industry and geographic location, and general economic conditions.

SOP 97-2 requires the seller of software that includes PCS to establish VSOE of fair value of the undelivered element of the contract in order to account separately for the PCS revenue. For certain of the Company’s products, VSOE of the fair value of PCS is determined by reference to stated renewals with consistent pricing of PCS and PCS renewals as a percentage of the software license fees. In other products, the Company determines VSOE by reference to contractual renewals, when the renewal terms are substantive. In those cases where VSOE of the fair value of PCS is determined by reference to stated renewals, the Company considers factors such as whether the period of the initial PCS term is relatively long when compared to the term of the software license or whether the PCS renewal rate is significantly below the Company’s normal pricing practices.

In the absence of customer-specific acceptance provisions, software license arrangements generally grant customers a right of refund or replacement only if the licensed software does not perform in accordance with its published specifications. If the Company's product history supports an assessment by management that the likelihood of non-acceptance is remote, the Company recognizes revenue when all other criteria of revenue recognition are met.

For those software license arrangements that include customer-specific acceptance provisions, such provisions are generally presumed to be substantive and the Company does not recognize revenue until the earlier of the receipt of a written customer acceptance, objective demonstration that the delivered product meets the customer-specific acceptance criteria or the expiration of the acceptance period. The Company also defers the recognition of revenue on transactions involving less-established or newly released software products that do not have a product history. The Company recognizes revenues on such arrangements upon the earlier of receipt of written acceptance or the first production use of the software by the customer.

For software license arrangements in which the Company acts as a sales agent for another company's products, revenues are recorded on a net basis. These include arrangements in which the Company does not take title to the products, is not responsible for providing the product or service, earns a fixed commission, and assumes credit risk only to the extent of its commission. For software license arrangements in which the Company acts as a distributor of another company's product, and in certain

[Table of Contents](#)

circumstances, modifies or enhances the product, revenues are recorded on a gross basis. These include arrangements in which the Company takes title to the products and is responsible for providing the product or service.

For software license arrangements in which the Company permits the customer to receive or exchange for unspecified future software products during the software license term, the Company recognizes revenue ratably over the license term, provided all other revenue recognition criteria have been met. For software license arrangements in which the customer has the right to change or alternate its use of currently licensed products, revenue is recognized upon delivery of the first copy of all of the licensed products, provided all other revenue recognition criteria have been met. For software license arrangements in which the customer is charged variable software license fees based on usage of the product, the Company recognizes revenue as usage occurs over the term of the licenses, provided all other revenue recognition criteria have been met.

Certain of the Company's software license arrangements include PCS terms that fail to achieve VSOE of fair value due to non-substantive renewal periods, or contain a range of possible PCS renewal amounts that is not sufficiently narrow to establish VSOE of fair value. For these arrangements, VSOE of fair value of PCS does not exist and revenues are therefore recognized ratably over the contractually specified PCS term. The Company typically classifies revenues associated with these arrangements in accordance with the contractually specified amounts assigned to the various elements, including software license fees and maintenance fees. The following are amounts included in revenues in the consolidated statements of operations for which VSOE of fair value does not exist for each element (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
Software license fees	\$ 6,660	\$ 2,677	\$ 13,659	\$ 7,854
Maintenance fees	2,356	1,011	4,958	3,144
Services	2,617	1,291	5,546	3,536
Total	<u>\$ 11,633</u>	<u>\$ 4,979</u>	<u>\$ 24,163</u>	<u>\$ 14,534</u>

Maintenance Fees. The Company typically enters into multi-year time-based software license arrangements that vary in length but are generally five years. These arrangements include an initial (bundled) PCS term of one or two years with subsequent renewals for additional years within the initial license period. For arrangements in which the Company looks to substantive renewal rates to evidence VSOE of fair value of PCS and in which the PCS renewal rate and term are substantive, VSOE of fair value of PCS is determined by reference to the stated renewal rate. For these arrangements, PCS revenues are recognized ratably over the PCS term specified in the contract. In arrangements where VSOE of fair value of PCS cannot be determined (for example, a time-based software license with a duration of one year or less or when the range of possible PCS renewal amounts is not sufficiently narrow), the Company recognizes revenue for the entire arrangement ratably over the PCS term.

For those arrangements that meet the criteria to be accounted for under contract accounting, the Company determines whether VSOE of fair value exists for the PCS element. For those situations in which VSOE of fair value exists for the PCS element, PCS is accounted for separately and the balance of the arrangement is accounted for under ARB No. 45 and the relevant guidance provided by SOP 81-1. For those arrangements in which VSOE of fair value does not exist for the PCS element, revenue is recognized to the extent direct and incremental costs are incurred until such time as the services are complete. Once services are complete, all remaining revenue is then recognized ratably over the remaining PCS period.

Services. The Company provides various professional services to customers, primarily project management, software implementation and software modification services. Revenues from arrangements to provide professional services are generally recognized as the related services are performed. For those arrangements in which services revenue is deferred and the Company determines that the costs of services are recoverable, such costs are deferred and subsequently expensed in proportion to the services revenue as it is recognized.

Hosting. The Company's hosting-related arrangements contain multiple products and services. As these arrangements generally do not contain a contractual right to take possession of the software at anytime during the hosting period without significant penalty, the Company applies the separation provisions of Emerging Issues Task Force (EITF) 00-21, *Revenue Arrangements with Multiple Deliverables*. The Company uses the relative fair value method of revenue recognition to allocate the total consideration derived from the arrangement to each of the elements. Any up-front fees allocated to the hosting services are recognized over the estimated life of the hosting relationship. Professional services revenues are recognized as the services are

[Table of Contents](#)

performed when the services have stand-alone value and over the estimated life of the hosting relationship when the services do not have stand-alone value.

The Company may execute more than one contract or agreement with a single customer. The separate contracts or agreements may be viewed as one multiple-element arrangement or separate agreements for revenue recognition purposes. The Company evaluates the facts and circumstances related to each situation in order to reach appropriate conclusions regarding whether such arrangements are related or separate. The conclusions reached can impact the timing of revenue recognition related to those arrangements.

Accrued Receivables. Accrued receivables represent amounts to be billed in the near future (less than 12 months).

Deferred Revenue. Deferred revenue includes (1) amounts currently due and payable from customers, and payments received from customers, for software licenses, maintenance and/or services in advance of providing the product or performing services, (2) amounts deferred whereby VSOE of the fair value of undelivered elements in a bundled arrangement does not exist, and (3) amounts deferred if other conditions for revenue recognition have not been met.

4. Share-Based Compensation Plans

Employee Stock Purchase Plan

Under the Company's 1999 Employee Stock Purchase Plan, as amended (the "ESPP"), a total of 1,500,000 shares of the Company's common stock have been reserved for issuance to eligible employees. Participating employees are permitted to designate up to the lesser of \$25,000 or 10% of their annual base compensation for the purchase of common stock under the ESPP. Purchases under the ESPP are made one calendar month after the end of each fiscal quarter. The price for shares of common stock purchased under the ESPP is 85% of the stock's fair market value on the last business day of the three-month participation period. Shares issued under the ESPP during the three and nine months ended September 30, 2008 totaled 21,884 and 76,333, respectively. No shares were issued under the ESPP during the nine months ended September 30, 2007, as the Company was not current with its filings with the SEC.

Accounting for Share-Based Payments Pursuant to SFAS 123(R)

The Company adopted SFAS No. 123(R), *Share-Based Payment* ("SFAS 123(R)"), as of October 1, 2005 using the modified prospective transition method. This revised accounting standard eliminated the ability to account for share-based compensation transactions using the intrinsic value method in accordance with APB Opinion No. 25, and requires instead that such transactions be accounted for using a fair-value-based method. SFAS 123(R) requires entities to record noncash compensation expense related to payment for employee services by an equity award in their financial statements over the requisite service period. In March 2005, the SEC issued Staff Accounting Bulletin ("SAB 107"), which does not modify any of SFAS 123(R)'s conclusions or requirements, but rather includes recognition, measurement and disclosure guidance for companies as they implement SFAS 123(R).

Upon adoption of SFAS 123(R), all of the Company's existing share-based compensation awards were determined to be equity classified awards. A portion of these options were reclassified to liability classification as they were subsequently cash settled. Under the modified prospective transition method, the Company is required to recognize noncash compensation costs for the portion of share-based awards that are outstanding as of October 1, 2005 for which the requisite service has not been rendered (i.e., nonvested awards). These compensation costs are based on the grant date fair value of those awards as calculated for pro forma disclosures under SFAS 123. The Company is recognizing compensation costs related to the nonvested portion of those awards in the financial statements from the SFAS 123(R) adoption date through the end of the requisite service period.

[Table of Contents](#)

A summary of stock options is as follows:

	Number of Shares	Weighted-Average Exercise Price (\$)	Weighted-Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value of In-the-Money Options (\$)
Outstanding, September 30, 2007	3,708,431	\$ 22.35		
Granted	—	—		
Exercised	(51,160)	10.75		
Cancelled/Forfeited/Expired	(66,946)	27.39		
Outstanding, December 31, 2007	3,590,325	22.43		
Granted	551,700	17.46		
Exercised	(288,020)	12.50		
Cancelled/Forfeited/Expired	(366,141)	30.05		
Outstanding, September 30, 2008	3,487,864	\$ 21.66	6.64	\$ 6,385,905
Exercisable, September 30, 2008	1,900,522	\$ 19.46	5.45	\$ 6,018,705

The weighted-average grant date fair value of stock options granted during the nine months ended September 30, 2008 and 2007 was \$9.62 and \$17.41, respectively. The Company issued treasury shares for the exercise of stock options during the nine months ended September 30, 2008 and 2007. The total intrinsic value of stock options exercised during the three months ended September 30, 2008 and 2007 was \$1.0 million and \$0.1 million, respectively. The total intrinsic value of stock options exercised during the nine months ended September 30, 2008 and 2007 was \$1.6 million and \$0.1 million, respectively.

The fair value of options granted during the three and nine months ended September 30, 2008 and 2007 was estimated on the date of grant using the Black-Scholes option-pricing model, a pricing model acceptable under SFAS 123(R), with the following weighted average assumptions:

	Three Months Ended September 30, 2008	Nine Months Ended September 30, 2008	Three Months Ended September 30, 2007	Nine Months Ended September 30, 2007
Expected life (years)	6.18	6.15	6.01	5.41
Interest rate	3.0%	3.1%	4.7%	4.9%
Volatility	56.2%	54.9%	47.7%	50.4%

Expected volatilities are based on the Company's historical common stock volatility derived from historical stock price data for historical periods commensurate with the options' expected life. The expected life of options granted represents the period of time that options granted are expected to be outstanding. The Company used the simplified method for determining the expected life as permitted under SAB 110, Topic 14, *Share-Based Payment*. The simplified method was used as the historical data did not provide a reasonable basis upon which to estimate the expected term. This is due to the extended period during which individuals were unable to exercise options while the Company was not current with its filings with the SEC. The risk-free interest rate is based on the implied yield currently available on United States Treasury zero coupon issues with a term equal to the expected life at the date of grant of the options. The expected dividend yield is zero as the Company has historically paid no dividends and does not anticipate dividends to be paid in the future.

During the nine months ended September 30, 2007, the Company granted long-term incentive program performance share awards ("LTIP Performance Shares") pursuant to the Company's 2005 Equity and Performance Incentive Plan, as amended (the "2005 Incentive Plan") representing 174,947 shares (based on a target of 100%) of the Company's common stock with a weighted-average grant date fair value of \$34.25 per share to various key employees of the Company, using the market price of the Company's common stock at the time of grant as the fair value per share. The Company did not grant any LTIP Performance Shares during the nine months ended September 30, 2008.

[Table of Contents](#)

A summary of nonvested LTIP Performance Shares is as follows:

Nonvested LTIP Performance Shares	Number of Shares at Expected Attainment	Weighted- Average Grant Date Fair Value
Nonvested at September 30, 2007	312,117	\$ 31.95
Granted	—	—
Vested	—	—
Change in expected attainment for fiscal 2005 and 2006 grants	(132,110)	29.00
Forfeited or expired	(5,060)	29.10
Nonvested at December 31, 2007	174,947	34.25
Granted	—	—
Vested	—	—
Forfeited or expired	(24,612)	34.30
Nonvested at September 30, 2008	150,335	\$ 34.24

These LTIP Performance Shares are earned, if at all, based upon the achievement, over a specified period that must not be less than one year and is typically a three-year period (the "Performance Period"), of performance goals related to (i) the compound annual growth over the Performance Period in the Company's 60-month backlog as determined and defined by the Company, (ii) the compound annual growth over the Performance Period in the diluted earnings per share as reported in the Company's consolidated financial statements, and (iii) the compound annual growth over the Performance Period in the total revenues as reported in the Company's consolidated financial statements. In no event will any of the LTIP Performance Shares become earned if the Company's earnings per share is below a predetermined minimum threshold level at the conclusion of the Performance Period. Assuming achievement of the predetermined minimum earnings per share threshold level, up to 150% of the LTIP Performance Shares may be earned upon achievement of performance goals equal to or exceeding the maximum target levels for compound annual growth over the Performance Period in the Company's 60-month backlog, diluted earnings per share and total revenues. Management must evaluate, on a quarterly basis, the probability that the target performance goals will be achieved, if at all, and the anticipated level of attainment in order to determine the amount of compensation costs to record in the consolidated financial statements.

Through September 30, 2007, the Company had accrued compensation costs assuming an attainment level of 110% for the awards granted in fiscal 2005 and 2006. During the three months ended December 31, 2007, the Company changed the expected attainment to 0% based upon revised forecasted diluted earnings per share, which the Company did not expect to achieve the predetermined earnings per share minimum threshold level required for the LTIP Performance Shares granted in fiscal 2005 and 2006 to be earned. As the performance goals were considered improbable of achievement, the Company reversed compensation costs related to the awards granted in fiscal 2005 and 2006 during the three months ended December 31, 2007. The Company did not achieve the predetermined earnings per share minimum threshold level as of September 30, 2008; therefore, the LTIP Performance Shares granted in fiscal year 2005 and 2006 were not earned and were not issued.

Based on forecasts for the performance period of the awards granted during the fiscal year ended September 30, 2007, management currently believes that an achievement level of 100% will be attained for those awards.

During the nine months ended September 30, 2008, pursuant to the Company's 2005 Incentive Plan, the Company granted restricted share awards ("RSAs"). These awards have requisite service periods of four years and vest in increments of 25% on the anniversary dates of the grants. Under each arrangement, stock is issued without direct cost to the employee. The Company estimates the fair value of the RSAs based upon the market price of the Company's stock at the date of grant. The RSA grants provide for the payment of dividends on the Company's common stock, if any, to the participant during the requisite service period (vesting period) and the participant has voting rights for each share of common stock. The Company recognizes compensation expense for RSAs on a straight-line basis over the requisite service period.

[Table of Contents](#)

A summary of nonvested RSAs are as follows:

Nonvested Restricted Share Awards	Restricted Share Awards	Date Fair Value
Nonvested at December 31, 2007	—	\$ —
Granted	471,400	17.95
Vested	—	—
Forfeited or expired	—	—
Nonvested at September 30, 2008	471,400	\$ 17.95

As of September 30, 2008, there were unrecognized compensation costs of \$13.5 million related to nonvested stock options, \$2.0 million related to nonvested LTIP Performance Shares, and \$5.1 million related to nonvested RSAs, which the Company expects to recognize over weighted-average periods of 2.5 years, 1.3 years and 3.7 years, respectively.

The Company recorded stock-based compensation expense in accordance with SFAS 123(R) for the three months ended September 30, 2008 and 2007 related to stock options, LTIP Performance Shares, RSAs, and the ESPP of \$2.6 million and \$2.8 million, respectively, with corresponding tax benefits of \$0.9 million and \$1.0 million, respectively. The Company recorded stock-based compensation expense in accordance with SFAS 123(R) for the nine months ended September 30, 2008 and 2007 related to stock options, LTIP Performance Shares, RSAs, and the ESPP of \$7.8 million and \$5.8 million, respectively, with corresponding tax benefits of \$2.8 million and \$2.1 million, respectively. Tax benefits in excess of the option's grant date fair value under SFAS 123(R) are classified as financing cash flows. No stock-based compensation costs were capitalized during the three or nine months ended September 30, 2008 and 2007. Estimated forfeiture rates, stratified by employee classification, have been included as part of the Company's calculations of compensation costs. The Company recognizes compensation costs for stock option awards which vest with the passage of time with only service conditions on a straight-line basis over the requisite service period.

Cash received from option exercises for the three months ended September 30, 2008 was \$2.8 million. The actual tax benefit realized for the tax deductions from option exercises totaled \$0.3 million for the three months ended September 30, 2008. Cash received from option exercises for the nine months ended September 30, 2008 was \$3.6 million. The actual tax benefit realized for the tax deductions from option exercises totaled \$0.5 million for the nine months ended September 30, 2008.

During the three months ended December 31, 2007, the Company reclassified 31,393 vested options from equity classification to liability classification, as these options were expected to cash settle subsequent to December 31, 2007 due to the suspension of option exercises because the Company was not current with its filings with the SEC. As a result, the Company recorded a liability of approximately \$0.1 million and recorded compensation expense of \$0.1 million in the three months ended December 31, 2007. This liability was paid during the nine months ended September 30, 2008. As of September 30, 2008, the Company was current with its filings with the SEC and, therefore, all outstanding options were classified as equity.

5. Goodwill

Changes in the carrying amount of goodwill attributable to each reportable operating segment, consisting primarily of foreign currency translation adjustments, were as follows (in thousands):

	Goodwill
Balance, September 30, 2007	\$ 205,715
Foreign currency translation adjustments	628
Adjustments - S2 (1)	13
Adjustments - Visual Web (2)	414
Balance, December 31, 2007	206,770
Foreign currency translation adjustments	(2,229)
Adjustments - S2 (3)	156
Adjustments - Visual Web (2)	(137)
Balance, September 30, 2008	\$ 204,560

Table of Contents

- (1) Adjustment to S2 Systems, Inc. acquisition relates to settlement of escrow balances in accordance with the purchase agreement.
- (2) Visual Web purchase accounting adjustment relates to an adjustment to deferred tax balances.
- (3) Adjustment to S2 Systems, Inc. acquisition relates to contingency payments made in accordance with the purchase agreement.

6. Software and Other Intangible Assets

The carrying amount and accumulated amortization of the Company's software that was subject to amortization at each balance sheet date are as follows (in thousands):

	September 30, 2008	December 31, 2007	September 30, 2007
Internally-developed software	\$ 13,098	\$ 13,299	\$ 13,302
Purchased software	86,214	82,410	80,836
	99,312	95,709	94,138
Less: accumulated amortization	(70,507)	(64,279)	(62,374)
Software, net	\$ 28,805	\$ 31,430	\$ 31,764

At September 30, 2008, the software net book value includes the following software purchased through acquisitions which is being marketed for external sale: \$1.5 million of S2 Systems, Inc. purchased software, \$3.0 million of eps Electronic Payment Systems AG purchased software, \$14.9 million of P&H Solutions, Inc. purchased software and \$1.0 million of Visual Web purchased software. The remaining software net book value of \$8.4 million is comprised of various software that has been acquired or developed for internal use.

Quarterly amortization of acquired software marketed for external sale is computed using the greater of the ratio of current revenues to total estimated revenues expected to be derived from the software or the straight-line method over an estimated useful life of three to six years. Software amortization expense recorded in the three months ended September 30, 2008 and 2007 totaled \$2.3 million and \$2.1 million, respectively. Software amortization expense recorded in the nine months ended September 30, 2008 and 2007 totaled \$6.8 million and \$6.2 million, respectively. These software amortization expense amounts are reflected in cost of software license fees in the consolidated statements of operations.

The carrying amount and accumulated amortization of the Company's other intangible assets that were subject to amortization at each balance sheet date are as follows (in thousands):

	September 30, 2008	December 31, 2007	September 30, 2007
Customer relationships	\$ 40,037	\$ 40,538	\$ 40,488
Purchased contracts	11,415	11,593	11,643
Trademarks and tradenames	2,256	2,266	2,246
Covenant not to compete	1,542	1,546	1,531
	<u>55,250</u>	<u>55,943</u>	<u>55,908</u>
Less: accumulated amortization	(22,451)	(17,855)	(16,223)
Other intangible assets, net	<u>\$ 32,799</u>	<u>\$ 38,088</u>	<u>\$ 39,685</u>

Other intangible assets amortization expense recorded in the three months ended September 30, 2008 and 2007 totaled \$1.6 million for each period. Other intangible assets amortization expense recorded in the nine months ended September 30, 2008 and 2007 totaled \$4.9 million for each period.

[Table of Contents](#)

Based on capitalized software and intangible assets at September 30, 2008, estimated amortization expense for future fiscal years is as follows (in thousands):

Fiscal Year Ending December 31,	Software Amortization	Other Intangible Assets Amortization
Remainder of 2008	\$ 2,446	\$ 1,583
2009	9,282	6,188
2010	8,126	6,144
2011	5,694	5,791
2012	2,871	4,720
Thereafter	386	8,373
Total	<u>\$ 28,805</u>	<u>\$ 32,799</u>

7. Derivative Instruments and Hedging Activities

The Company maintains an interest-rate risk-management strategy that uses derivative instruments to mitigate the risk of variability in future cash flows (and related interest expense) associated with currently outstanding and forecasted floating rate bank borrowings due to changes in the benchmark interest rate, the London Inter-Bank Offer Rate ("LIBOR").

At September 30, 2008, the Company had \$75 million of outstanding variable-rate borrowings under a 5-year \$150 million revolving facility that matures on September 29, 2011. The variable-rate benchmark is 3-month LIBOR. During the fiscal year ended September 30, 2007, the Company entered into two interest-rate swaps to convert its existing and forecasted variable-rate borrowing needs to fixed rates.

Although the Company believes that these interest rate swaps will mitigate the risk of variability in future cash flows associated with existing and forecasted variable rate borrowings during the term of the swaps, neither swap qualifies for hedge accounting. Accordingly, the loss resulting from the change in the fair value of the interest rate swaps for the three and nine month periods ended September 30, 2008 of \$0.8 million and \$1.5 million, respectively, is reflected as expense in other income (expense), net in the accompanying consolidated statements of operations.

Changes in the fair value of the interest rate swaps were as follows (in thousands):

	Asset (Liability)
Beginning fair value, September 30, 2007	\$ (2,077)
Loss recognized in earnings	(2,475)
Fair value, December 31, 2007	<u>(4,552)</u>
Net settlement payments	971
Loss recognized in earnings	(1,529)
Ending fair value, September 30, 2008	<u>\$ (5,110)</u>

As of September 30, 2008, the \$5.1 million fair value liability is recorded as \$3.1 million and \$2.0 million in other current liabilities and other noncurrent liabilities, respectively, on the accompanying consolidated balance sheet.

Net settlements are measured monthly and paid quarterly. The net settlements are recorded in other income (expense) in the accompanying consolidated statements of operations. Included in the \$5.1 million fair value at September 30, 2008, is approximately \$0.7 million of net settlement obligations paid by the Company subsequent to September 30, 2008.

Subsequent to September 30, 2008, events in the global credit markets have impacted the expectation of near-term variable borrowing rates. As a result, the Company has experienced an unfavorable impact to the fair value liability of its interest rate swaps. The fair value liability has increased approximately \$0.7

[Table of Contents](#)

8. Fair Value Financial Instruments

Effective January 1, 2008, the Company adopted the provisions of SFAS No. 157, *Fair Value Measurements* (“SFAS 157”), for financial assets and financial liabilities. In accordance with Financial Accounting Standards Board Staff Position No. 157-2, *Effective Date of FASB Statement No. 157*, the Company will delay application of SFAS 157 for non-financial assets and non-financial liabilities, until January 1, 2009. SFAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements.

SFAS 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. SFAS 157 establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

- Level 1 Inputs - Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.
- Level 2 Inputs - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (such as interest rates, volatilities, prepayment speeds, credit risks, etc.) or inputs that are derived principally from or corroborated by market data by correlation or other means.
- Level 3 Inputs - Unobservable inputs for determining the fair values of assets or liabilities that reflect an entity’s own assumptions about the assumptions that market participants would use in pricing the assets or liabilities.

Derivatives. Derivatives are reported at fair value utilizing Level 2 inputs. The Company utilizes valuation models prepared by a third-party with observable market data inputs to estimate fair value of its interest rate swaps.

Commons Stock Warrants. Common stock warrants are reported at fair value utilizing Level 2 inputs. The Company utilized a valuation model prepared by a third-party with observable market data inputs to estimate fair value of the common stock warrants.

The following table summarizes financial assets and financial liabilities measured at fair value on a recurring basis as of September 30, 2008, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value (in thousands):

Description	September 30, 2008	Fair Value Measurements at Reporting Date Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Derivative liabilities	\$ 5,110	\$ —	\$ 5,110	\$ —
Common stock warrants	\$ 24,003	\$ —	\$ 24,003	\$ —

Certain non-financial assets and non-financial liabilities measured at fair value on a recurring basis include reporting units measured at fair value in the first step of a goodwill impairment test. Certain non-financial assets measured at fair value on a non-recurring basis include non-financial assets and non-financial liabilities measured at fair value in the second step of a goodwill impairment test, as well as intangible assets and other non-financial long-lived assets measured at fair value for impairment assessment. As stated above, SFAS 157 will be applicable to these fair value measurements beginning January 1, 2009.

[Table of Contents](#)

The Company pays interest quarterly on its long-term revolving credit facility based upon the LIBOR rate plus a margin ranging from 0.625% to 1.375%, the margin being dependent upon the Company’s total leverage ratio at the end of the quarter. At September 30, 2008, the fair value of the Company’s long-term revolving credit facility approximates its carrying value.

9. Corporate Restructuring and Other Reorganization Charges

Changes in the liability for corporate restructuring charges were as follows (in thousands):

	Termination Benefits
Balance, September 30, 2007	\$ 2,726
Additional restructuring charges incurred	477
Amounts paid during the period	(1,829)
Other	23
Balance, December 31, 2007	1,397
Additional restructuring charges incurred	3,293
Amounts paid during the period	(1,872)
Other	58

Other includes the impact of foreign currency translation.

At September 30, 2008, December 31, 2007 and September 30, 2007, the liabilities were classified as short-term in accrued employee compensation in the accompanying consolidated balance sheets. See Note 17, "International Business Machines Corporation Information Technology Outsourcing Agreement" for additional severance charges incurred.

During the three months ended September 30, 2008, we reduced our headcount by 85 employees as a part of our strategic plan to reduce operating expenses. In connection with these actions, during the three month period ended September 30, 2008, approximately \$3.0 million of termination costs were recognized in general and administrative expense in the accompanying consolidated statement of operations. The charges, by segment, were as follows for the three months ended September 30, 2008: \$2.1 million in the Americas segment, \$0.1 million in the EMEA segment, and \$0.8 million in the Asia Pacific segment. Approximately \$0.1 million of the termination costs were paid during the three months ended September 30, 2008. The remaining liability is expected to be paid over the next 12 months.

10. Common Stock and Earnings (Loss) Per Share

In December 2004, the Company announced that the board of directors approved a stock repurchase program authorizing the Company, from time to time as market and business conditions warrant, to acquire up to \$80.0 million of its common stock. In May 2006, the Company's board of directors approved an increase of \$30.0 million to the stock repurchase program, bringing the total of the approved plan to \$110.0 million. In March 2007, the Company's board of directors approved an increase of \$100 million to the current repurchase authorization, bringing the total authorization to \$210 million. Under the program to date, the Company has purchased approximately 6,049,484 shares for approximately \$154 million. The maximum remaining dollar value of shares authorized for purchase under the stock repurchase program was approximately \$56 million as of September 30, 2008. Purchases will be made from time to time as market and business conditions warrant, in open market, negotiated or block transactions, subject to applicable laws, rules and regulations.

Earnings (loss) per share is computed in accordance with SFAS No. 128, *Earnings per Share*. Basic earnings (loss) per share is computed on the basis of weighted average outstanding common shares. Diluted earnings (loss) per share is computed on the basis of basic weighted average outstanding common shares adjusted for the dilutive effect of stock options and other outstanding dilutive securities.

[Table of Contents](#)

The following table reconciles the average share amounts used to compute both basic and diluted earnings (loss) per share (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
Weighted average share outstanding:				
Basic weighted average shares outstanding	34,259	36,318	34,518	36,849
Add: Dilutive effect of stock options, restricted stock awards and other dilutive securities	319	—	—	—
Diluted weighted average shares outstanding	<u>34,578</u>	<u>36,318</u>	<u>34,518</u>	<u>36,849</u>

For the three months ended September 30, 2008, 5.5 million options to purchase shares, contingently issuable shares, and common stock warrants were excluded from the diluted net income per share computation as their effect would be anti-dilutive. For the three months ended September 30, 2007, 4.0 million options to purchase shares and contingently issuable shares were excluded from the diluted net income (loss) per share computation due to the net loss. For the nine months ended September 30, 2008 and 2007, 7.0 million and 4.0 million, respectively, options to purchase shares, restricted share awards, contingently issuable shares, and common stock warrants were excluded from the diluted net income (loss) per share computation due to the net loss.

11. Other Income/Expense

Other income (expense) is comprised of the following items (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
Foreign currency transactions gains (losses)	\$ 1,601	\$ 492	\$ 4,523	\$ (1,280)
Change in fair value of interest rate swap	(775)	(2,077)	(1,529)	(2,077)
Other	106	8	81	(90)
Total	<u>\$ 932</u>	<u>\$ (1,577)</u>	<u>\$ 3,075</u>	<u>\$ (3,447)</u>

12. Comprehensive Income (Loss)

The Company's components of other comprehensive income (loss) were as follows (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008 (As restated)	2007
Net income (loss)	\$ 1,717	\$ (8,615)	\$ (2,356)	\$ (11,752)
Foreign currency translation adjustments	(9,062)	2,205	(6,762)	5,414
Comprehensive loss	<u>\$ (7,345)</u>	<u>\$ (6,410)</u>	<u>\$ (9,118)</u>	<u>\$ (6,338)</u>

Accumulated other comprehensive income (loss) included in the Company's consolidated balance sheets represents the accumulated foreign currency translation adjustment. Since the undistributed earnings of the Company's foreign subsidiaries are considered to be indefinitely reinvested, the components of accumulated other comprehensive income (loss) have not been tax effected.

[Table of Contents](#)

13. Segment Information

The Company's chief operating decision maker, together with other senior management personnel, currently focus their review of consolidated financial information and the allocation of resources based on reporting of operating results, including revenues and operating income (loss), for the geographic regions of the Americas, Europe/Middle East/Africa ("EMEA") and Asia/Pacific. The Company's products are sold and supported through distribution networks covering these three geographic regions, with each distribution network having its own sales force. The Company supplements its distribution networks with independent reseller and/or distributor arrangements. As such, the Company has concluded that its three geographic regions are its reportable operating segments.

The Company's chief operating decision makers review financial information presented on a consolidated basis, accompanied by disaggregated information about revenues and operating income by geographical region.

The Company allocated segment support expenses such as global product delivery, business operations and management based upon percentage of revenue per segment. Corporate costs are allocated as a percentage of the headcount by segment. The prior period amounts for operating income (loss) have been reclassified to conform to current period presentation, which reflect a change in the allocation of certain costs related to acquired businesses across the reportable operating segments versus solely in the region in which the acquired business was located in when acquired. The following are revenues and operating income (loss) for the periods indicated (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008 (As restated)	2007
Revenues:				
Americas	\$ 53,057	\$ 43,753	\$ 149,594	\$ 148,628
EMEA	45,360	30,928	129,591	96,222
Asia/Pacific	10,143	10,191	29,257	28,079
	<u>\$ 108,560</u>	<u>\$ 84,872</u>	<u>\$ 308,442</u>	<u>\$ 272,929</u>
Operating income (loss):				
Americas	\$ 5,807	\$ 911	\$ 8,576	\$ 15,869
EMEA	(1,314)	(8,402)	(2,660)	(20,267)
Asia/Pacific	(1,535)	(148)	(3,775)	1,852
	<u>\$ 2,958</u>	<u>\$ (7,639)</u>	<u>\$ 2,141</u>	<u>\$ (2,546)</u>

No single customer accounted for more than 10% of the Company's consolidated revenues during the three or nine months ended September 30, 2008 or 2007. Aggregate revenues attributable to customers in the United Kingdom accounted for 13.1% and 7.4% of the Company's consolidated revenues during the nine months ended September 30, 2008 and 2007, respectively. Aggregate revenues attributable to customers in Canada accounted for 5.5% and 10.9% of the Company's consolidated revenues during the nine months ended September 30, 2008 and 2007, respectively.

14. Income Taxes

The effective tax rate for the three months ended September 30, 2008 was 49.1%. The effective tax rate for the nine months ended September 30, 2008 was 165.6%. The effective tax rate in these periods is higher than the U.S. effective rate of 35% due to the low level of income before taxes and the impact of the Company's inability to recognize income tax benefits during the period as a result of losses sustained in certain tax jurisdictions where the future utilization of the losses are uncertain and by the recognition of tax expense associated with the transfer of certain intellectual property rights from U.S. to non-U.S. entities. The effective tax rate for the three months ended September 30, 2007 was 14.9%, which is lower than the U.S. effective rate of 35% as a result of losses in tax jurisdictions for which we receive no tax benefit and the recognition of tax expense associated with the transfer of certain intellectual property rights from U.S. to non-U.S. entities. The effective tax rate for the nine months ended September 30, 2007 is not calculable due to the pretax loss and tax charge reported for the period as a result of losses in tax jurisdictions for which we receive no tax benefit and the recognition of tax expense associated with the transfer of certain intellectual property rights from U.S. to non-U.S. entities.

[Table of Contents](#)

In July 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes - an interpretation of FASB Statement No. 109* ("FIN 48"). The Company adopted the provisions of FIN 48 effective October 1, 2007. FIN 48 prescribes a recognition threshold and measurement attribute for the recognition and measurement of tax positions taken or expected to be taken in a tax return and also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. As a result of the implementation of FIN 48, the Company recognized a decrease to retained earnings of \$3.3 million, which included at October 1, 2007 an increase of \$2.7 million in net unrecognized tax benefits. In addition, reclassification in balance sheet accounts as required by FIN 48 resulted in an increase in noncurrent deferred income tax assets of \$4.3 million, an increase in other long term assets of \$1.5 million and an increase in other long term liabilities of \$16.2 million. As of the date of adoption, the Company's gross unrecognized tax benefits totaled \$14.8 million. Of this amount, \$9.0 million represents the net unrecognized tax benefits that, if recognized, would favorably impact the effective income tax rate. During the nine months ended September 30, 2008, the unrecognized tax benefit balance was reduced by approximately \$2.7 million through reclasses to other tax accounts on the balance sheet.

The Company files income tax returns in the U.S. federal jurisdiction, various state and local jurisdictions, and many foreign jurisdictions. The U.S., United Kingdom and Canada are the main taxing jurisdictions in which the Company operates. A number of years may elapse before an uncertain tax position is audited and finally resolved. While it is often difficult to predict the final outcome or the timing of resolution of any particular uncertain tax position, the Company believes that the accruals for income taxes reflect the most probable outcome. The Company will adjust these accruals, as well as the related interest, in light of changing facts and circumstances. The years open for audit varies depending on the tax jurisdiction. In the U.S., the Company's tax returns for years following fiscal year 2004 are open for audit. In the United Kingdom, the Company's tax returns for the years following 2002 are open for audit, while in Canada, the Company's tax returns for years following 2001 are open for audit.

The Internal Revenue Service is currently auditing the Company's fiscal year 2005 and 2006 income tax returns. The Company's Canadian income tax returns covering fiscal years 2002 through 2005 are under audit by the Canada Revenue Agency. The Company believes it is reasonably possible that the total amount of unrecognized tax benefits will decrease within the next 12 months by approximately \$1.7 million due to settlement of various audits.

The Company accrues interest related to uncertain tax positions in interest expense or interest income and recognizes penalties related to uncertain tax positions in other income or other expense. As of September 30, 2008, \$1.3 million is accrued for the payment of interest and penalties related to income tax liabilities.

15. Contingencies

Legal Proceedings

From time to time, the Company is involved in various litigation matters arising in the ordinary course of its business. Other than as described below, the Company is not currently a party to any legal proceedings, the adverse outcome of which, individually or in the aggregate, the Company believes would be likely to have a material adverse effect on the Company's financial condition or results of operations.

Class Action Litigation. In November 2002, two class action complaints were filed in the U.S. District Court for the District of Nebraska (the "Court") against the Company and certain individuals alleging violations of Sections 10(b) and 20(a) of the Securities Exchange Act of 1934 and Rule 10b-5 thereunder. Pursuant to a Court order, the two complaints were consolidated as *Desert Orchid Partners v. Transaction Systems Architects, Inc., et al.*, with Genesee County Employees' Retirement System designated as lead plaintiff. The Second Amended Consolidated Class Action Complaint previously alleged that during the purported class period, the Company and the named defendants misrepresented the Company's historical financial condition, results of operations and its future prospects, and failed to disclose facts that could have indicated an impending decline in the Company's revenues. That complaint also alleged that, prior to August 2002, the purported truth regarding the Company's financial condition had not been disclosed to the market. On May 31, 2006, lead plaintiff filed a Third Amended Complaint ("Third Complaint"). The Third Complaint alleged the same misrepresentations as described above, while simultaneously alleging that the purported truth about the Company's financial condition was being disclosed throughout that time, commencing in April 1999. The Third Complaint sought unspecified damages, interest, fees, and costs.

On June 14, 2006, the Company and the individual defendants filed a motion to dismiss the Third Complaint pursuant to Rules 8 and 12 of the Federal Rules of Civil Procedure. Lead Plaintiff opposed the motion. Prior to any ruling on the motion to dismiss, on November 7, 2006, the parties entered into a Stipulation of Settlement for purposes of settling all of the claims in the Class Action Litigation, with no admissions of wrongdoing by the Company or any individual defendant. The settlement provided for

[Table of Contents](#)

an aggregate cash payment of \$24.5 million of which, net of insurance, the Company contributed approximately \$8.5 million. The settlement was approved by the Court on March 2, 2007 and the Court ordered the case dismissed with prejudice against the Company and the individual defendants.

On March 27, 2007, James J. Hayes, a class member, filed a notice of appeal with the United States Court of Appeals for the Eighth Circuit appealing the Court's order. On August 13, 2008, the Court of Appeals affirmed the judgment of the District Court dismissing the case. Thereafter, Mr. Hayes petitioned the Court of Appeals for a rehearing en banc, which petition was denied on September 22, 2008.

16. International Business Machines Corporation Alliance

On December 16, 2007, the Company entered into an Alliance Agreement ("Alliance") with International Business Machines Corporation ("IBM") relating to joint marketing and optimization of the Company's electronic payments application software and IBM's middleware and hardware platforms, tools and services. On March 17, 2008, the Company and IBM entered into Amendment No. 1 to the Alliance ("Amendment No.1" and included hereafter in all references to the "Alliance"), which changed the timing of certain payments to be made by IBM. Under the terms of the Alliance, each party will retain ownership of its respective intellectual property and will independently determine product offering pricing to customers. In connection with the formation of the Alliance, the Company granted warrants to IBM to purchase up to 1,427,035 shares of the Company's common stock at a price of \$27.50 per share and up to 1,427,035 shares of the Company's common stock at a price of \$33.00 per share. The warrants are exercisable for five years.

Under the terms of the Alliance, on December 16, 2007, IBM paid the Company an initial non-refundable payment of \$33.3 million in consideration for the estimated fair value of the warrants described above. The fair value of the warrants granted, as subsequently determined by an independent third party appraiser, is approximately \$24.0 million and is recorded as common stock warrants in the accompanying consolidated balance sheet as of September 30, 2008 and December 31, 2007. The remaining balance of \$9.3 million is related to prepaid incentives and other obligations and is recorded in the Alliance agreement liability in the accompanying consolidated balance sheet as of December 31, 2007.

During the nine months ended September 30, 2008, the Company received an additional payment from IBM of \$37.3 million per Amendment No. 1. This payment has been recorded in the Alliance agreement liability in the accompanying consolidated balance sheet as of September 30, 2008. This amount represents a prepayment of funding for technical enablement milestones and incentive payments to be earned under the Alliance and related agreements and, accordingly, a portion of this payment is subject to refund by the Company to IBM under certain circumstances. As of September 30, 2008, \$20.7 million is refundable subject to achievement of future milestones.

The future costs incurred by the Company related to internally developed software associated with the technical enablement milestones will be capitalized in accordance with SFAS No. 86, *Accounting for Costs of Computer Software to be Sold, Leased, or Otherwise Marketed* ("SFAS 86"), when the resulting

product reaches technological feasibility. Prior to reaching technological feasibility, the costs will be expensed as incurred. The Company will receive partial reimbursement from IBM for expenditures incurred if certain technical enablement milestones and delivery dates specified in the Alliance are met. Reimbursements from IBM for expenditures determined to be direct and incremental to satisfying the technical enablement milestones will be used to offset the amounts expensed or capitalized as described above but not in excess of non-refundable cash received or receivable. During the three and nine months ended September 30, 2008, the Company incurred \$2.5 million and \$5.4 million, respectively, of costs related to fulfillment of the technical enablement milestones. The reimbursement of these costs was recorded as a reduction of the Alliance agreement liability and a reduction in capitalizable costs under SFAS 86 in the accompanying consolidated balance sheet as of September 30, 2008, and a reduction of operating expenses in the accompanying consolidated statements of operations for the three and nine months ended September 30, 2008.

Also, during the nine months ended September 30, 2008, the Company reached certain technical enablement milestones for which approximately \$4.5 million has been collected and \$0.3 million is recorded in billed receivables in the accompanying consolidated balance sheet as of September 30, 2008.

[Table of Contents](#)

Changes in the Alliance agreement liability were as follows (in thousands):

	Alliance Agreement Liability
Balance, September 30, 2007	\$ —
IBM payment	33,334
Common stock warrants	(24,003)
Balance, December 31, 2007	9,331
IBM payment	37,333
Technical enablement milestones	4,800
Costs related to fulfillment of technical enablement milestones	(5,354)
Balance, September 30, 2008	\$ 46,110

Of the \$46.1 million Alliance agreement liability, \$5.4 million is short-term and \$40.7 million is long-term in the accompanying consolidated balance sheet as of September 30, 2008.

IBM will pay the Company additional amounts upon meeting certain prescribed technical enablement obligations and incentives payable upon IBM recognizing revenue from end-user customers as a result of the Alliance. The revenue related to the incentive payments will be deferred until the Company has reached substantial completion of the technical enablement milestones. Subsequent to reaching substantial completion, revenue will be recognized as sales incentives are earned.

The stated initial term of the Alliance is five years, subject to extension for successive two year terms if not previously terminated by either party and subject to earlier termination for cause.

17. International Business Machines Corporation Information Technology Outsourcing Agreement

On March 17, 2008, the Company entered into a Master Services Agreement (“Outsourcing Agreement”) with IBM to outsource the Company’s internal information technology (“IT”) environment to IBM. Under the terms of the Outsourcing Agreement, IBM will provide the Company with global IT infrastructure services including the following services, which services were provided by the Company: cross functional delivery management services, asset management services, help desk services, end user services, server system management services, storage management services, data network services, enterprise security management services and disaster recovery/business continuity plans (collectively, the “IT Services”). The Company will retain responsibility for its security policy management and on-demand business operations.

The initial term of the Outsourcing Agreement is seven years, commencing on March 17, 2008. The Company has the right to extend the Outsourcing Agreement for one additional one-year term unless otherwise terminated in accordance with the terms of the Outsourcing Agreement. Under the Outsourcing Agreement, the Company retains the right to terminate the agreement both for cause and for its convenience. However, upon any termination of the Outsourcing Agreement by the Company for any reason (other than for material breach by IBM), the Company will be required to pay a termination charge to IBM, which charge may be material.

The Company will pay IBM for the IT Services through a combination of fixed and variable charges, with the variable charges fluctuating based on the Company’s actual need for such services as well as the applicable service levels and statements of work. Based on the currently projected usage of these IT Services, the Company expects to pay \$116 million to IBM in service fees and project costs over the initial seven-year term.

In addition, IBM will provide the Company with certain transition services required to transition the Company’s IT operations embodied in the IT Services in accordance with a mutually agreed upon transition plan (the “Transition Services”). The Company currently expects the Transition Services to be completed approximately 18 months after the effective date of the Outsourcing Agreement and to pay IBM approximately \$8 million for the Transition Services over a period of five years. These Transition Services will be recognized as incurred based on the capital or expense nature of the cost. The Company has expensed approximately \$3.8 million and \$6.3 million for Transition Services during the three and nine months ended September 30, 2008, respectively, that are included in general and administrative expenses in the accompanying consolidated statement of operations. Of the \$6.3 million recognized during the nine months ended September 30, 2008, approximately \$0.7 million has been paid, approximately \$1.7 million is included in other noncurrent liabilities and \$3.9 million is included

in other liabilities in the accompanying consolidated balance sheet at September 30, 2008. The Company incurred an additional \$0.6 million and \$0.9 million of staff augmentation costs related to the Transition Services during the three and nine months ended September 30, 2008 that are included in general and administrative expenses in the accompanying consolidated statement of operations.

The Outsourcing Agreement has performance standards and minimum services levels that IBM must meet or exceed. If IBM fails to meet a given performance standard, the Company would, in certain circumstances, receive a credit against the charges otherwise due.

Additionally, the Company has the right to periodically perform benchmark studies to determine whether IBM's price and performance are consistent with the then current market. The Company has the right to conduct such benchmark studies, at its cost, beginning in the second year of the Outsourcing Agreement.

As a result of the Outsourcing Agreement, 16 employees of the Company became employees of IBM and an additional 62 positions were eliminated by the Company. During the three and nine month periods ended September 30, 2008, \$0.5 million and \$1.8 million, respectively, of termination costs were recognized in general and administrative expense in the accompanying consolidated statements of operations. The charges, by segment, were as follows for the three months ended September 30, 2008: \$0.4 million in the Americas segment, none in the EMEA segment, and \$0.1 million in the Asia Pacific segment. The charges, by segment, were as follows for the nine months ended September 30, 2008: \$1.5 million in the Americas segment, \$0.1 million in the EMEA segment, and \$0.2 million in the Asia Pacific segment.

	Termination Benefits
Balance, December 31, 2007	\$ —
Additional restructuring charges incurred	1,836
Amounts paid during the period	(967)
Other	(69)
Balance, September 30, 2008	<u>\$ 800</u>

Other includes the impact of foreign currency translation.

As of September 30, 2008, \$0.8 million is accrued in accrued employee compensation for these termination costs in the accompanying consolidated balance sheet. The Company anticipates that these amounts will be paid by the end of fiscal 2009.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-Looking Statements

This report contains forward-looking statements based on current expectations that involve a number of risks and uncertainties. Generally, forward-looking statements do not relate strictly to historical or current facts, and include words or phrases such as "management anticipates," "we believe," "we anticipate," "we expect," "we plan," "we will," "we are well positioned," and words and phrases of similar impact, and include, but are not limited to, statements regarding future operations, business strategy, business environment and key trends, as well as statements related to expected financial and other benefits from our recent acquisition of Visual Web Solutions, Inc., and Stratasoft Sdn Bhd and those related to our organizational restructuring activities. The forward-looking statements are made pursuant to safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Any or all of the forward-looking statements in this document may turn out to be incorrect. They may be based on inaccurate assumptions or may not account for known or unknown risks and uncertainties. Consequently, no forward-looking statement is guaranteed, and our actual future results may vary materially from the results expressed or implied in our forward-looking statements. The cautionary statements in this report expressly qualify all of our forward-looking statements. In addition, we are not obligated, and do not intend, to update any of our forward-looking statements at any time unless an update is required by applicable securities laws. Factors that could cause actual results to differ from those expressed or implied in the forward-looking statements include, but are not limited to, those discussed in Item 1A in the section entitled "Risk Factors – Factors That May Affect Our Future Results or The Market Price of Our Common Stock."

The following discussion should be read together with our financial statements and related notes contained in this report and with the financial statements and related notes and Management's Discussion & Analysis in our Annual Report on Form 10-K for the fiscal year ended September 30, 2007, as amended by the Form 10-K/A for the same period filed March 4, 2008, the Transition Report on Form 10-Q for the three months ended December 31, 2007, as amended by the Form 10-Q/A for the same period filed March 4, 2008, the Quarterly Report on Form 10-Q for the three months ended March 31, 2008 filed May 9, 2008, and the Quarterly Report on Form 10-Q for the three and six months ended June 30, 2008 filed August 11, 2008. Results for the nine months ended September 30, 2008 are not necessarily indicative of results that may be attained in the future.

Trademarks and Service Marks

ACI, the ACI logo, BASE24, ON/2, OpeN/2, ENGUARD, Network Express, PaymentWare and CO-ach, among others, are registered trademarks and/or registered service marks of ACI Worldwide, Inc., or one of its subsidiaries, in the United States and/or other countries. BASE24-eps, ACI Retail Commerce Server, NET24, Commerce Gateway, Smart Chip Manager, Proactive Risk Manager, PRM, ICE, WebGate, SafeTGate, DataWise, ACI Wholesale Payment System, ACI Money Transfer System or MTS, ACI Enterprise Banker, ACI Payments Manager, ACI Card Management System, ACI Dispute Management System, and WPS, among others, have pending registrations or are common-law trademarks and/or service marks of ACI Worldwide, Inc., or one of its subsidiaries, in the United States and/or other countries. Other parties' marks referred to in this report are the property of their respective owners.

Change in Fiscal Year End

Effective January 1, 2008, the Company changed its fiscal year end from September 30 to December 31. The Company's new fiscal year commenced January 1, 2008 and will end on December 31, 2008. This quarterly report on Form 10-Q compares the financial position as of September 30, 2008 to December 31, 2007 and September 30, 2007, and the results of operations for the three and nine months ended September 30, 2008 with the results of operations for the three and nine months ended September 30, 2007. The Company changed its fiscal year end to align its sales contracting and delivery

processes with its customers and to allow for more effective communication with the capital markets and investment community by being consistent with its peer group.

Overview

As described in Note 2 of the consolidated condensed financial statements, ACI Worldwide, Inc. has restated its previously filed consolidated financial statements as of September 30, 2008, and for the nine month period ended September 30, 2008 included in its Quarterly Report on Form 10-Q for the quarter ended September 30, 2008, which was filed with the Securities and Exchange Commission on November 7, 2008. We identified errors in our financial statements related to \$1.9 million in revenue recognized during the three months ended March 31, 2008 for a specific software project in the Asia/Pacific reportable operating segment that should have been deferred until further project milestones were achieved. In addition, \$0.4 million in expenses should have been deferred related to the same software project. The income tax effect of these errors was approximately \$0.1 million.

We develop, market, install and support a broad line of software products and services primarily focused on facilitating electronic payments. In addition to our own products, we distribute, or act as a sales agent for, software developed by third parties. Our products are sold and supported through distribution networks covering three geographic regions – the Americas, EMEA and Asia/Pacific. Each distribution network has its own sales force and supplements its sales force with independent reseller and/or

[Table of Contents](#)

distributor networks. Our products and services are used principally by financial institutions, retailers and electronic payment processors, both in domestic and international markets. Accordingly, our business and operating results are influenced by trends such as information technology spending levels, economic changes in the financial markets, the growth rate of the electronic payments industry, mandated regulatory changes, and changes in the number and type of customers in the financial services industry. Our products are marketed under the ACI Worldwide brand.

We derive a majority of our revenues from non-domestic operations and believe our greatest opportunities for growth exist largely in international markets. Refining our global infrastructure is a critical component of driving our growth. We have launched a globalization strategy intended to streamline our supply chain and provide low-cost centers of expertise to support a growing international customer base. A subsidiary in Ireland serves as the focal point for certain international product development and commercialization efforts. This subsidiary oversees remote software development operations in Romania and elsewhere and manages certain of our intellectual property rights. We are also taking a direct selling and support strategy in certain countries where historically we have used third-party distributors to represent our products, in an effort to develop closer relationships with our customers and develop a stronger overall position in those countries. Our principal executive offices are located in New York state to manage our global infrastructure more strategically.

Through a service called ACI On Demand, we host our payment systems and sell them as a service to banks, retailers and processors as an alternative to customers managing their ACI software in-house.

We are maturing many of our retail payment engines. These products were developed or acquired by ACI over several years and include BASE24, TRANS24-ef, ON/2, OpeN/2 and ASx. Our strategy is to help customers migrate to our next-generation BASE24-eps solution as we discontinue standard support for previous products. This will allow customers to take advantage of our newest technology and allow ACI to more efficiently focus R&D investment.

Key trends that currently impact our strategies and operations include:

- **Increasing electronic payment transaction volumes.** Electronic payment volumes continue to increase around the world, taking market share from traditional cash and check transactions. We commissioned an industry study that determined that electronic payment volumes are expected to grow at approximately 13% per year from 2004 through 2009, with varying growth rates based on the type of payment and part of the world. We leverage the growth in transaction volumes through the licensing of new systems to customers whose older systems cannot handle increased volume and through the licensing of capacity upgrades to existing customers.
- **Increasing competition.** The electronic payments market is highly competitive and subject to rapid change. Our competition comes from in-house information technology departments, third-party electronic payment processors and third-party software companies located both within and outside of the United States. Many of these companies are significantly larger than we are and have significantly greater financial, technical and marketing resources. As electronic payment transaction volumes increase, third-party processors tend to provide competition to our solutions, particularly among customers that do not seek to differentiate their electronic payment offerings. As consolidation in the financial services industry continues, we anticipate that competition for those customers will intensify.
- **Aging payments software.** In many markets, electronic payments are processed using software developed by internal information technology departments, much of which was originally developed over ten years ago. Increasing transaction volumes, industry mandates and the overall costs of supporting these older technologies often serve to make these systems obsolete, creating opportunities for us to replace aging software with newer and more advanced products.
- **Adoption of open systems technology.** In an effort to leverage lower-cost computing technologies and current technology staffing and resources, many financial institutions, retailers and electronic payment processors are seeking to transition their systems from proprietary technologies to open technologies such as Windows, UNIX and Linux. Our continued investment in open systems technologies is, in part, designed to address this demand.
- **Electronic payments fraud and compliance.** As electronic payment transaction volumes increase, criminal elements continue to find ways to commit a growing volume of fraudulent transactions using a wide range of techniques. Financial institutions, retailers and electronic payment processors continue to seek ways to leverage new technologies to identify and prevent fraudulent transactions. Due to concerns with international terrorism and money laundering, financial institutions in particular are being faced with increasing scrutiny and regulatory pressures. We

continue to see opportunity to offer our fraud detection solutions to help customers manage the growing levels of electronic payment fraud and compliance activity.

- **Adoption of smart card technology.** In many markets, card issuers are being required to issue new cards with embedded chip technology. Chip-based cards are more secure, harder to copy and offer the opportunity for multiple functions on one card (e.g., debit, credit, electronic purse, identification, health records, etc.). The EMV standard for issuing and processing debit and credit card transactions has emerged as the global standard, with many regions throughout the world working on EMV rollouts. The primary benefit of EMV deployment is a reduction in electronic payment fraud, with the additional benefit that the core infrastructure necessary for multi-function chip cards is being put in place (e.g., chip card readers in ATMs and POS devices). We are working with many customers around the world to facilitate EMV deployments, leveraging several of our solutions.
- **Single Euro Payments Area (“SEPA”) and Faster Payments Mandates.** The SEPA and Faster Payments initiatives, primarily focused on the European Economic Community and the United Kingdom, are designed to facilitate lower costs for cross-border payments and reduce timeframes for settling electronic payment transactions. Our retail and wholesale banking solutions provide key functions that help financial institutions address these mandated regulations.
- **Financial institution consolidation.** Consolidation continues on a national and international basis, as financial institutions seek to add market share and increase overall efficiency. Such consolidations have increased, and may continue to increase, in their number, size and market impact as a result of the global economic crisis and the financial crisis affecting the banking and financial industries. There are several potential negative effects of increased consolidation activity. Continuing consolidation of financial institutions may result in a smaller number of existing and potential customers for our products and services. Consolidation of two of our customers could result in reduced revenues if the combined entity were to negotiate greater volume discounts or discontinue use of certain of our products. Additionally, if a non-customer and a customer combine and the combined entity in turn decides to forego future use of our products, our revenue would decline. Conversely, we could benefit from the combination of a non-customer and a customer when the combined entity continues use of our products and, as a larger combined entity, increases its demand for our products and services. We tend to focus on larger financial institutions as customers, often resulting in our solutions being the solutions that survive in the consolidated entity.
- **Electronic payments convergence.** As electronic payment volumes grow and pressures to lower overall cost per transaction increase, financial institutions are seeking methods to consolidate their payment processing across the enterprise. We believe that the strategy of using service-oriented-architectures to allow for re-use of common electronic payment functions such as authentication, authorization, routing and settlement will become more common. Using these techniques, financial institutions will be able to reduce costs, increase overall service levels, enable one-to-one marketing in multiple bank channels and manage enterprise risk. Our organizational structure is, in part, focused on this trend, by facilitating the delivery of integrated payment functions that can be re-used by multiple bank channels, across both the consumer and wholesale bank. While this trend presents an opportunity for us, it may also expand the competition from third-party electronic payment technology and service providers specializing in other forms of electronic payments. Many of these providers are larger than we are and have significantly greater financial, technical and marketing resources.
- **Global Financial Markets Uncertainty.** The continuing uncertainty in the global financial markets has negatively impacted general business conditions. It is possible that a weakening economy could adversely affect our customers, their purchasing plans, or even their solvency, but we cannot predict whether or to what extent this will occur. We have diversified counterparties and customers, but we continue to monitor our counterparty and customer risks closely. While the effects of the economic conditions in the future are not predictable, we believe our global presence, the breadth and diversity of our service offerings and our enhanced expense management capabilities position us well in a slower economic climate.
- **Availability of Credit.** There have been significant disruptions in the capital and credit markets during the past year and many lenders and financial institutions have reduced or ceased to provide funding to borrowers. The availability of credit, confidence in the entire financial sector, and volatility in financial markets has been adversely affected. These disruptions are likely to have some impact on all institutions in the U.S. banking and financial industries, including our lenders and the lenders of our customers. The Federal Reserve Bank has been providing vast amounts of liquidity into the banking system to compensate for weaknesses in short-term borrowing markets and other capital

markets. A reduction in the Federal Reserve’s activities or capacity could reduce liquidity in the markets, thereby increasing funding costs or reducing the availability of funds to finance our existing operations as well as those of our customers. We are not currently dependent upon short-term funding, and the limited availability of credit in the market has not affected our revolving credit facility or our liquidity or materially impacted our funding costs.

Several other factors related to our business may have a significant impact on our operating results from year to year. For example, the accounting rules governing the timing of revenue recognition in the software industry are complex and it can be difficult to estimate when we will recognize revenue generated by a given transaction. Factors such as maturity of the software product licensed, payment terms, creditworthiness of the customer, and timing of delivery or acceptance of our products often cause revenue related to sales generated in one period to be deferred and recognized in later periods. For arrangements in which services revenue is deferred, related direct and incremental costs may also be deferred. Additionally, while the majority of our contracts are denominated in the United States dollar, a substantial portion of our sales are made, and some of our expenses are incurred, in the local currency of countries other than the United States. Fluctuations in currency exchange rates in a given period may result in the recognition of gains or losses for that period. Also during the year ended September 30, 2007, we entered into two interest rate swaps with a commercial bank whereby we pay a fixed rate of 5.375% and 4.90% and receive a floating rate indexed to the three-month LIBOR from the counterparty on a notional amount of \$75 million and forecasted borrowings of \$50 million, respectively. Fluctuations in interest rates in a given period may result in the recognition of gains or losses for that period.

We continue to seek ways to grow through both organic sources and acquisitions. We continually look for potential acquisitions designed to improve our solutions breadth or provide access to new markets. As part of our strategy, we seek acquisition candidates that are strategic, capable of being integrated into our operating environment, and financially accretive to our financial performance.

International Business Machines Corporation Alliance

On December 16, 2007, we entered into an Alliance Agreement (“Alliance”) with International Business Machines Corporation (“IBM”) relating to joint marketing and optimization of our electronic payments application software and IBM’s middleware and hardware platforms, tools and services. On March 17, 2008, the Company and IBM entered into Amendment No. 1 to the Alliance (“Amendment No. 1” and included hereafter in all references to the “Alliance”), which changed the timing of certain payments to be made by IBM. Under the terms of the Alliance, each party will retain ownership of its respective intellectual property and will independently determine product offering pricing to customers. In connection with the formation of the Alliance, we granted warrants to IBM to purchase up to 1,427,035 shares of our common stock at a price of \$27.50 per share and up to 1,427,035 shares of our common stock at a price of \$33.00 per share. The warrants are exercisable for five years.

The stated initial term of the Alliance is five years, subject to extension for successive two-year terms if not previously terminated by either party and subject to earlier termination for cause.

During the nine months ended September 30, 2008, we received a second payment from IBM of \$37.3 million per the Alliance. This payment has been recorded in the Alliance agreement liability in the accompanying consolidated balance sheet as of September 30, 2008. This amount represents a prepayment of funding for technical enablement milestones and incentive payments to be earned under the Alliance and related agreements, and accordingly a portion of this payment is subject to refund by us to IBM under certain circumstances. As of September 30, 2008, \$20.7 million is refundable subject to achievement of future milestones.

International Business Machines Corporation Outsourcing Agreement

On March 17, 2008, we entered into a Master Services Agreement (“Outsourcing Agreement”) with IBM to outsource our internal information technology (“IT”) environment to IBM. Under the terms of the Outsourcing Agreement, IBM will provide us with global IT infrastructure services including the following services, which services are currently provided by our employees: cross functional delivery management services, asset management services, help desk services, end user services, server system management services, storage management services, data network services, enterprise security management services and disaster recovery/business continuity plans (collectively, the “IT Services”). We will retain responsibility for our security policy management and on-demand business operations.

[Table of Contents](#)

The initial term of the Outsourcing Agreement is seven years, commencing on March 17, 2008. We have the right to extend the Outsourcing Agreement for one additional one-year term unless otherwise terminated in accordance with the terms of the Outsourcing Agreement. Under the Outsourcing Agreement, we retain the right to terminate the agreement both for cause and for its convenience. However, upon any termination of the Outsourcing Agreement by us for any reason (other than for material breach by IBM), we will be required to pay a termination charge to IBM, which charge may be material.

We will pay IBM for the IT Services through a combination of fixed and variable charges, with the variable charges fluctuating based on our actual need for such services as well as the applicable service levels and statements of work. Based on the currently projected usage of these IT Services, we expect to pay \$116 million to IBM in service fees and project costs over the initial seven-year term.

In addition, IBM will provide us with certain transition services required to transition our IT operations embodied in the IT Services in accordance with a mutually agreed upon transition plan (the “Transition Services”). We currently expect the Transition Services to be completed approximately 18 months after the effective date of the Outsourcing Agreement and to pay IBM approximately \$8 million for the Transition Services over a period of five years. We have recorded approximately \$3.8 million and \$6.3 million of expense for Transition Services during the three and nine months ended September 30, 2008, respectively, that are included in general and administrative expenses in the accompanying consolidated statement of operations. We expect to recognize the remaining expense for Transition Services during the fourth quarter of 2008 and the first half of 2009. We incurred an additional \$0.6 million and \$0.9 million of staff augmentation costs related to the Transition Services during the three and nine months ended September 30, 2008 that are included in general and administrative expenses in the accompanying consolidated statement of operations.

To protect our expectations regarding IBM’s performance, the Outsourcing Agreement has performance standards and minimum services levels that IBM must meet or exceed. If IBM fails to meet a given performance standard, we would, in certain circumstances, receive a credit against the charges otherwise due.

Additionally, to assure that the charges under the Outsourcing Agreement do not become significantly higher than the market rate for such services, we have the right to periodically perform benchmark studies to determine whether IBM’s price and performance are consistent with the then current market. We have the right to conduct such benchmark studies, at its cost, beginning in the second year of the Outsourcing Agreement.

As a result of the Outsourcing Agreement, 16 of our employees became employees of IBM and another 62 positions were eliminated.

2008 Restructuring Plan

During the three months ended September 30, 2008, we reduced our headcount by 85 employees as a part of our strategic plan to reduce operating expenses. In connection with these actions, during the three month period ended September 30, 2008, \$3.0 million of termination costs were recognized in general and administrative expense in the accompanying consolidated statements of operations. Headcount reductions will continue during the fourth quarter of 2008 and the first quarter of 2009 and we expect to recognize an additional \$7.0 million to \$12.0 million of expense.

The majority of the severance costs related to the headcount reduction will be paid during the fourth quarter of 2008 and the first quarter of 2009, with a portion being spread through the third quarter of 2009. We expect to complete our restructuring activities by the end of the first quarter of 2009.

Acquisitions

On February 7, 2007, we acquired Visual Web Solutions, Inc. (“Visual Web”). Visual Web markets trade finance and web-based cash management solutions, primarily to financial institutions in the Asia/Pacific region. Visual Web had sales and customer support office in Singapore, and a product development facility in Bangalore, India. The aggregate purchase price of Visual Web, including direct costs of the acquisition, was \$8.3 million, net of \$1.1 million of cash acquired

On April 2, 2007, we acquired Stratasoft Sdn. Bhd. (“Stratasoft”). Stratasoft was a Kuala Lumpur based company focused on the provision of mainframe based payments systems to the Malaysian market. Prior to the acquisition, Stratasoft had been a distributor of our OCM24 product within the Malaysian market since 1995. The aggregate purchase price of Stratasoft, including direct costs of the acquisition, was \$2.5 million, net of \$0.7 million of cash acquired.

[Table of Contents](#)

Backlog

Included in backlog estimates are all software license fees, maintenance fees and services specified in executed contracts, as well as revenues from assumed contract renewals to the extent that we believe recognition of the related revenue will occur within the corresponding backlog period. We have historically included assumed renewals in backlog estimates based upon automatic renewal provisions in the executed contract and our historic experience with customer renewal rates.

Our 60-month backlog estimate represents expected revenues from existing customers using the following key assumptions:

- Maintenance fees are assumed to exist for the duration of the license term for those contracts in which the committed maintenance term is less than the committed license term.
- License and facilities management arrangements are assumed to renew at the end of their committed term at a rate consistent with our historical experiences.
- Non-recurring license arrangements are assumed to renew as recurring revenue streams.
- Foreign currency exchange rates are assumed to remain constant over the 60-month backlog period for those contracts stated in currencies other than the U.S. dollar.
- Our pricing policies and practices are assumed to remain constant over the 60-month backlog period.

In computing our 60-month backlog estimate, the following items are specifically not taken into account:

- Anticipated increases in transaction volumes in customer systems.
- Optional annual uplifts or inflationary increases in recurring fees.
- Services engagements, other than facilities management, are not assumed to renew over the 60-month backlog period.
- The potential impact of merger activity within our markets and/or customers is not reflected in the computation of our 60-month backlog estimate.

For the three months ended December 31, 2007, we completed a comprehensive review of the assumptions used and data required in computing our backlog estimates. The 60-month and 12-month backlog estimates set forth below for the period ended September 30, 2007 have been revised to reflect these adjustments. The revisions resulted in an increase in the 60-month backlog estimate of \$14 million and a decrease in the 12-month backlog estimate of \$2.5 million, the majority of which is monthly recurring revenue for the period ended September 30, 2007.

The review identified two categories of adjustments which are reflected in the above revision:

- Adjustments due to inaccurate or incomplete data resulting in a historical over-statement of previously reported backlog estimates, and
- Adjustments required to conform with the recently adopted backlog policy resulting in a historical under-statement of previously reported backlog estimates.

While this review is complete and we do not expect further adjustments to previously reported backlog estimates, we continue to review the processes, procedures, tools, and assumptions used in preparing backlog estimates.

In addition, we also completed a review of our customer renewal experience over the 12-month period ended December 31, 2007. The impact of this review resulted in a revision to the renewal assumptions used in computing the 60-month and 12-month backlog estimates. We expect to perform an annual review of customer renewal experience. In the event a revision to renewal assumptions is determined to be necessary, prior periods will be adjusted for comparability purposes.

[Table of Contents](#)

The following table sets forth our 60-month backlog estimate, by geographic region, as of September 30, 2008, June 30, 2008, March 31, 2008, December 31, 2007 and September 30, 2007 (in millions). Dollar amounts reflect foreign currency exchange rates as of each period end.

	September 30, 2008 (As restated)	June 30, 2008 (As restated)	March 31, 2008 (As restated)	December 31, 2007	September 30, 2007
Americas	\$ 737	\$ 737	\$ 724	\$ 733	\$ 717
EMEA	509	533	522	504	489
Asia/Pacific	159	159	153	143	135
Total	<u>\$ 1,405</u>	<u>\$ 1,429</u>	<u>\$ 1,399</u>	<u>\$ 1,380</u>	<u>\$ 1,341</u>

We also estimate 12-month backlog, segregated between monthly recurring and non-recurring revenues, using a methodology consistent with the 60-month backlog estimate. Monthly recurring revenues include all monthly license fees, maintenance fees and processing services fees. Non-recurring revenues include other software license fees and services. Amounts included in our 12-month backlog estimate assume renewal of one-time license fees on a monthly fee basis if such renewal is expected to occur in the next 12 months. The following table sets forth our 12-month backlog estimate, by geographic region, as of September 30, 2008, June 30, 2008, March 31, 2008, December 31, 2007 and September 30, 2007 (in millions). Dollar amounts reflect currency exchange rates as of each period end.

	September 30, 2008			June 30, 2008			March 31, 2008		
	Monthly Recurring	Non-Recurring	Total	Monthly Recurring	Non-Recurring	Total	Monthly Recurring	Non-Recurring	Total
		(As restated)	(As restated)		(As restated)	(As restated)		(As restated)	(As restated)
Americas	\$ 135	\$ 28	\$ 163	\$ 135	\$ 32	\$ 167	\$ 132	\$ 35	\$ 167
EMEA	77	41	118	79	53	132	76	68	144
Asia/Pacific	27	15	42	28	14	42	27	11	38
Total	<u>\$ 239</u>	<u>\$ 84</u>	<u>\$ 323</u>	<u>\$ 242</u>	<u>\$ 99</u>	<u>\$ 341</u>	<u>\$ 235</u>	<u>\$ 114</u>	<u>\$ 349</u>

	December 31, 2007			September 30, 2007		
	Monthly Recurring	Non-Recurring	Total	Monthly Recurring	Non-Recurring	Total
Americas	\$ 130	\$ 30	\$ 160	\$ 125	\$ 34	\$ 159
EMEA	73	66	139	70	66	136
Asia/Pacific	26	11	37	25	8	33
Total	<u>\$ 229</u>	<u>\$ 107</u>	<u>\$ 336</u>	<u>\$ 220</u>	<u>\$ 108</u>	<u>\$ 328</u>

Estimates of future financial results are inherently unreliable. Our backlog estimates require substantial judgment and are based on a number of assumptions as described above. These assumptions may turn out to be inaccurate or wrong, including for reasons outside of management's control. For example, our customers may attempt to renegotiate or terminate their contracts for a number of reasons, including mergers, changes in their financial condition, or general changes in economic conditions in the customer's industry or geographic location, or we may experience delays in the development or delivery of products or services specified in customer contracts which may cause the actual renewal rates and amounts to differ from historical experiences. Changes in foreign currency exchange rates may also impact the amount of revenue actually recognized in future periods. Accordingly, there can be no assurance that amounts included in backlog estimates will actually generate the specified revenues or that the actual revenues will be generated within the corresponding 12-month or 60-month period. Additionally, because backlog estimates are operating metrics, the estimates are not subject to the same level of internal review or controls as a GAAP financial measure.

[Table of Contents](#)

RESULTS OF OPERATIONS

The following table presents the consolidated statements of operations as well as the percentage relationship to total revenues of items included in our Consolidated Statements of Operations (amounts in thousands):

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2008		2007		2008		2007	
	Amount	% of Total Revenue	Amount	% of Total Revenue	Amount	% of Total Revenue	Amount	% of Total Revenue
	(As restated)							
Revenues:								
Initial license fees (ILFs)	\$ 25,174	23.2%	\$ 12,754	15.0%	\$ 66,550	21.6%	\$ 61,392	22.5%
Monthly license fees (MLFs)	21,286	19.6%	16,102	19.0%	55,863	18.1%	46,908	17.2%
Software license fees	46,460	42.8%	28,856	34.0%	122,413	39.7%	108,300	39.7%
Maintenance fees	33,963	31.3%	31,316	36.9%	98,267	31.9%	92,504	33.9%
Services	28,137	25.9%	24,700	29.1%	87,762	28.5%	72,125	26.4%
Total revenues	<u>108,560</u>	<u>100.0%</u>	<u>84,872</u>	<u>100.0%</u>	<u>308,442</u>	<u>100.0%</u>	<u>272,929</u>	<u>100.0%</u>
Expenses:

Revenues

Total revenues for the three months ended September 30, 2008 increased \$23.7 million, or 27.9%, compared to the same period of 2007 as a result of a \$17.6 million, or 61.0%, increase in software license fee revenues, a \$3.4 million, or 13.9%, increase in services revenues and a \$2.6 million, or 8.5%, increase in maintenance fee revenues.

During the three months ended September 30, 2008, we recognized \$4.1 million of revenues associated with certain Faster Payments implementations in the United Kingdom. Of this amount, approximately \$0.8 million is reported in initial license fee revenue, \$0.2 million is reported in maintenance fees, and approximately \$3.1 million is reported as services revenue.

License Fee Revenues

Customers purchase the right to license ACI software for the term of their agreement which term is generally 60 months. Within these agreements are specified capacity limits typically measured based on transaction volumes. ACI employs measurement tools that monitor the number of transactions processed by customers and if contractually specified limits are exceeded, additional fees are charged for the overage. Capacity overages may occur at varying times throughout the term of the agreement depending on the product, the size of the customer, and the significance of customer transaction volume growth. Depending on specific circumstances, multiple overages or no overages may occur during the term of the agreement.

[Table of Contents](#)

Initial License Fee (ILF) Revenue

ILF revenue includes license and capacity revenues that do not recur on a monthly or quarterly basis. Included in ILF revenues are license and capacity fees that are recognizable at the inception of the arrangement and license and capacity fees that are recognizable at interim points during the term of the arrangement, including those that are recognizable annually, due to negotiated customer payment terms. ILF revenues during the three months ended September 30, 2008 compared to the same period in 2007, increased by \$8.6 million, primarily in the EMEA reportable operating segment. This increase was driven by recognition of ILF revenues associated with new deals or term renewals signed during the current period and customer “go-live” events. There was also an increase of \$3.8 million related to capacity revenues primarily in the EMEA reportable operating segment, within the three months ended September 30, 2008 as compared to the same period in 2007.

Monthly License Fee (MLF) Revenue

MLF revenues are license and capacity revenues that are paid up-front but recognized as revenue ratably over an extended period and license and capacity revenues that are paid in monthly or quarterly increments due to negotiated customer payment terms. The increase in MLF revenues during the three months ended September 30, 2008, as compared to the same period of 2007, is primarily due to an increase in the amount of paid up-front revenue that is recognized ratably and capacity overages during the current period payable monthly or quarterly by customers in the Americas reportable operating segment. Approximately \$3.5 million of the increase in MLF revenue is due to paid up-front revenue that is recognized ratably, is short-term in nature, and is not expected to recur in future periods.

Maintenance Fee Revenue

Maintenance fee revenue includes standard and enhanced maintenance or any post contract support fees received from customers for the provision of product support services. The increase in maintenance fee revenues during the three months ended September 30, 2008, compared to the same period of 2007, is primarily a result of an increase in the number of customers that achieved live status, primarily in the Americas and EMEA reportable operating segments, subsequent to September 30, 2007.

Services Revenue

Services revenues include fees earned through implementation services, professional services and processing services. Implementation services include product installations, product upgrades, customer specific modifications (“CSMs”) and product education. Professional services include business consultancy, technical consultancy, on site support services, CSMs, product education, and testing services. Processing services include hosting, on-demand, and facilities management services.

Services revenue increased \$3.4 million, or 13.9%, primarily as a result of an increase in implementation services revenue in the EMEA reportable operating segment, and to a lesser extent, the Americas reportable operating segment. The increase in the EMEA reportable operating segment was largely attributable to \$3.1 million of revenues associated with Faster Payments implementations.

Expenses

Total operating expenses for the three months ended September 30, 2008 increased \$13.1 million, or 14.2%, compared to the same period of 2007 as a result of a \$9.2 million, or 37.9%, increase in cost of maintenance and services, a \$6.2 million, or 25.5%, increase in general and administrative costs, a \$0.8 million, or 7.7%, increase in cost of software license fees, and a \$0.1 million, or 0.6%, increase in cost of selling and marketing. These increases were partially offset by a \$3.2 million, or 22.2%, decrease in research and development costs.

Cost of Software License Fees

Cost of software license fees represents the costs associated with maintaining software products that have already been developed. Software license fees costs include human resource costs and other incidental costs for maintaining software products as well as the amortization of previously capitalized internally developed and acquired software costs. Examples of maintaining software products include product management, documentation, publications and education.

The cost of software license fees for the three months ended September 30, 2008 increased compared to the same period of 2007 due to higher personnel and related costs of \$1.7 million attributable to reallocations of personnel from certain business functions (primarily research and development, services, and sales and marketing) to invest in the Global Product Management function and to support the fulfillment of the technical enablement milestones under the Alliance and other development work. This increase was partially offset by \$0.9 million of reimbursement from IBM for certain expenditures determined to be direct and incremental to satisfying the technical enablement milestones under the Alliance and are recorded as a reduction of cost of software license fees.

[Table of Contents](#)

Cost of Maintenance and Services

Cost of maintenance and services includes costs to provide hosting services and both the costs of maintaining our software products at customer sites as well as the service costs required to deliver, install and support software at customer sites. Maintenance costs include the efforts associated with providing the customer with upgrades, 24-hour helpdesk, post go-live (remote) support and production-type support for software that was previously installed at a customer location. Service costs include human resource costs and other incidental costs such as travel and training required for both pre go-live and post go-live support. Such efforts include project management, delivery, product customization and implementation, installation support, consulting, configuration, and on-site support.

Cost of maintenance and services for the three months ended September 30, 2008 increased compared to the same period of 2007 as a result of higher personnel and related costs of \$6.0 million required primarily to support the implementation services for the increase in large complex multi-product installations. Costs of maintenance and services also increased as a result of the recognition of \$0.7 million of previously deferred expenses associated with the completion of certain Faster Payments implementations in the EMEA reportable operating segment as well as a \$1.0 million decrease in other deferred implementation costs compared to the same period of 2007. Additionally, cost of maintenance and services increased \$1.5 million for the three months ended September 30, 2008 primarily as a result of an \$1.2 million increase in distributor commission expense compared to the same period of 2007. The remaining increase of \$0.3 million is primarily due to an increase in third-party software maintenance fees.

Research and Development

Research and development (“R&D”) expenses are primarily human resource costs related to the creation of new products as well as improvements made to existing products. Continued R&D effort on existing products addresses issues, if any, related to regulatory requirements and processing mandates as well as compatibility with new operating system releases and generations of hardware.

R&D expense for the three months ended September 30, 2008 decreased as compared to the same period of 2007, due to lower personnel and related costs of \$2.1 million resulting from reallocations of personnel primarily to the services function in support of large complex, multi-product customer installations and \$1.1 million of reimbursement from IBM for certain expenditures determined to be direct and incremental to satisfying the technical enablement milestones under the Alliance and are recorded as a reduction of R&D expense.

Selling and Marketing

Selling and marketing includes both the costs related to selling our products to current and prospective customers as well as the costs related to promoting the Company, its products and the research efforts required to measure customers’ future needs and satisfaction levels. Selling costs are primarily the human resource and travel costs related to the effort expended to license our products and services to current and potential clients within defined territories and/or industries as well as the management of the overall relationship with customer accounts. Selling costs also include the costs associated with assisting distributors in their efforts to sell our products and services in their respective local markets. Marketing costs include costs needed to promote the Company and its products as well as perform or acquire market research to help us better understand what products our customers are looking for in the future. Marketing costs also include the costs associated with measuring customers’ opinions toward the Company, our products and personnel.

Selling and marketing expense for the three months ended September 30, 2008 were essentially flat compared to the same period in 2007 with an increase of \$0.1 million.

General and Administrative

General and administrative expenses are primarily human resource costs including executive salaries and benefits, personnel administration costs, and the costs of staff support functions such as legal, administrative, human resources and finance and accounting.

General and administrative expense for the three months ended September 30, 2008 increased \$6.2 million compared to the same period of 2007 primarily as a result of \$4.4 million of expenses for Transition Services incurred related to the IBM Outsourcing Agreement and a \$1.1 million increase in severance expense. The remaining increase of \$0.7 million is primarily due to an increase in telecommunications expense and costs associated with moving to our new Omaha facility.

[Table of Contents](#)

Other Income and Expense

Other income and expense includes interest income and expense, foreign currency gains and losses, and other non-operating items. Fluctuating currency rates impacted the three months ended September 30, 2008 by \$1.6 million in net foreign currency gains, compared to \$0.5 million in net gains during the same period in 2007. A \$0.8 million loss on change in fair value of interest rate swaps was incurred during the three months ended September 30, 2008, compared to a \$2.1 million loss in the same period of 2007. Interest income for the three months ended September 30, 2008 decreased \$0.6 million, or 48.9%, as compared to the corresponding period of 2007 as a result of lower interest rates and interest income on income tax returns in 2007 that did not recur in 2008. Interest expense decreased \$1.0 million, or 46.7%, for the three months ended September 30, 2008 compared to the corresponding period of 2007 as a result of lower interest rates and interest expense on income tax returns in 2007 that did not recur in 2008.

Income Taxes

The effective tax rate for the three months ended September 30, 2008 was 49.1%. The effective tax rate is higher than the U.S. effective rate of 35% due to the low level of income before taxes and the impact of our inability to recognize income tax benefits during the period as a result of losses sustained in certain tax jurisdictions where the future utilization of the losses are uncertain and by the recognition of tax expense associated with the transfer of certain intellectual property rights from U.S. to non-U.S. entities. The effective tax rate for the three months ended September 30, 2007 was 14.9%, which is lower than the U.S. effective rate of 35% as a result of losses in tax jurisdictions for which we receive no tax benefit and the recognition of tax expense associated with the transfer of certain intellectual property rights from U.S. to non-U.S. entities.

Nine Month Period Ended September 30, 2008 Compared to Nine Month Period Ended September 30, 2007

Revenues

Total revenues for the nine months ended September 30, 2008 increased \$35.5 million, or 13.0%, compared to the same period of 2007 as a result of a \$15.6 million, or 21.7%, increase in services revenues, a \$14.1 million, or 13.0%, increase in software license fee revenues, and a \$5.8 million, or 6.2%, increase in maintenance fee revenues.

During the nine months ended September 30, 2008, we recognized \$17.5 million of revenues associated with certain Faster Payments implementations in the United Kingdom. Of this amount, approximately \$5.3 million is reported in ILF revenues, \$0.2 million is reported in maintenance fees, and approximately \$12.0 million is reported in services revenue.

Initial License Fee (ILF) Revenue

The increase in ILF revenues during the nine months ended September 30, 2008 compared to the same period in 2007 is primarily due to recognition of ILF revenues associated with new deals or term renewals signed during the period and customer “go-live” events. Additionally, \$5.3 million of ILF revenues associated with Faster Payments implementations in the United Kingdom were recognized during the nine months ended September 30, 2008. The increase in ILF revenues during the nine month period was offset by a decline in capacity revenues that were recognized during the nine months ended September 30, 2007, which did not repeat in the current period, specifically in the America’s reportable operating segment.

Monthly License Fee (MLF) Revenue

The increase in MLF revenues during the nine months ended September 30, 2008 compared to the same period of 2007 is primarily due to an increase in the amount of paid up-front revenue that is recognized ratably and capacity overages payable monthly or quarterly in the Americas reportable operating segment.

Maintenance Fee Revenue

The increase in maintenance fee revenues during the nine months ended September 30, 2008 compared to the same period of 2007 is primarily a result of an increase in the number of customers that achieved live status in all three reportable operating segments subsequent to December 31, 2007.

Services Revenue

Services revenue increased \$15.6 million, or 21.7%, during the nine months ended September 30, 2008 compared to the same period in 2007 primarily as a result of a \$15.0 million, or 31.8%, increase in implementation and professional services revenues, and a \$0.6 million, or 2.7%, increase in processing services revenues. The increase in implementation and professional services was driven by \$12.0 million of revenues associated with Faster Payments in the EMEA reportable operating segment and a large

[Table of Contents](#)

multi-product implementation in the Americas reportable operating segment. Processing services growth was driven primarily by Enterprise Banker application services growth offset by the cancellation of a large facilities management contract in Canada.

Expenses

Total operating expenses for the nine months ended September 30, 2008 increased \$30.8 million, or 11.2%, compared to the same period of 2007 as a result of a \$23.4 million, or 31.4%, increase in cost of maintenance and services, a \$5.9 million, or 11.3%, increase in cost of selling and marketing, a \$4.2 million, or 13.0%, increase in cost of software, and a \$0.8 million, or 1.1%, increase in general and administrative costs, partially offset by a \$3.5 million, or 8.6%, decrease in R&D expense.

Cost of Software License Fees

The cost of software license fees for the nine months ended September 30, 2008, increased compared to the same period of 2007 due to higher personnel and related costs of \$5.4 million attributable to reallocation of personnel from certain business functions (primarily research and development, services, and sales and marketing) to invest in the Global Product Management function and to support the fulfillment of the technical enablement milestones under the Alliance and other development work. Additionally, cost of software license fees expense increased \$0.9 million resulting from an increase in depreciation and amortization. This increase was partially offset by \$1.8 million of reimbursement from IBM for certain expenditures determined to be direct and incremental to satisfying the technical enablement milestones under the Alliance and are recorded as a reduction of cost of software license fees. The remainder of the decrease is primarily due to an increase in other deferred implementation costs compared to the same period in 2007.

Cost of Maintenance and Services

Cost of maintenance and services for the nine months ended September 30, 2008 increased compared to the same period of 2007 as a result of higher personnel and related costs of \$18.8 million required primarily to support the implementation services for the increase in large complex multi-product

installations. Costs of maintenance and services also increased as a result of the recognition of \$2.8 million deferred expenses associated with the completion of Faster Payments implementation in the EMEA reportable operating segment and a large multi-product implementation in the Americas operating segment offset by an increase of \$1.4 million in additional deferred implementation costs for various products currently being installed. Additionally, cost of maintenance and services increased \$1.7 million for the nine months September 30, 2008 as a result of an increase in distributor commission expense and an increase of \$1.1 million from higher third party software maintenance expense compared to the same period on 2007. The remaining \$0.4 million increase is related to miscellaneous items including insurance, telecommunications, and facilities costs.

Research and Development

R&D expense for the nine months ended September 30, 2008 decreased \$3.5 million compared to the same period of 2007 as a result of lower personnel and related costs of \$1.1 million and \$2.4 million of reimbursement from IBM for certain expenditures determined to be direct and incremental to satisfying the technical enablement milestones under the Alliance and are recorded as a reduction of R&D expense.

Selling and Marketing

Selling and marketing expense for the nine months ended September 30, 2008 increased \$5.9 million compared to the same period of 2007 as a result of an increase of \$3.8 million in personnel and related costs and \$0.7 million in advertising and promotional expenses to support the 2008 sales plan and Alliance joint sales and marketing initiatives. In addition, selling and marketing expenses increased as a result of a \$0.4 million investment in sales support tools and a \$0.2 million increase in professional fees. The remaining increase of \$0.8 million is primarily due to an increase in telecommunications and facilities costs.

General and Administrative

General and administrative expense for the nine months ended September 30, 2008 increased \$0.8 million compared to the same period of 2007. Included in the nine months ended September 30, 2007, with no corresponding amount during the same period in 2008, were approximately \$9.5 million of expenses related to the historical stock option review. Included in the nine months ended September 30, 2008, with no corresponding amounts during the same period in 2007, were \$7.2 million of expenses for Transition Services related to the IBM Outsourcing Agreement. The remaining increase in general and administrative expenses is primarily the result of a \$1.0 million increase in professional fees, \$0.8 million increase in severance expense and a \$0.7 million increase in personnel and related costs compared to the same period in the prior year. The remaining increase of \$0.6 million is primarily due to an increase in telecommunications expense and costs associated with moving to our new Omaha facility.

[Table of Contents](#)

Other Income and Expense

Other income and expense includes interest income and expense, foreign currency gains and losses, and other non-operating items. Fluctuating currency rates impacted the nine months ended September 30, 2008 by \$4.5 million in net foreign currency gains, compared with \$1.3 million in net losses during the same period in 2007. A \$1.5 million loss on change in fair value of interest rate swaps was incurred during the nine months ended September 30, 2008, compared to a \$2.1 million loss in the same period of 2007. Interest income for the nine months ended September 30, 2008 decreased \$1.3 million, or 39.6%, compared to the corresponding period of 2007 as a result of lower interest rates and interest income on income tax returns in 2007 that did not recur in 2008. Interest expense decreased \$1.6 million, or 31.5%, for the nine months ended September 30, 2008 compared to the corresponding period of 2007 as a result of lower interest rates and interest expense on income tax returns in 2007 that did not recur in 2008.

Income Taxes

The effective tax rate for the nine months ended September 30, 2008 was 165.6%. The effective tax rate in this period is higher than the U.S. effective rate of 35% due to the low level of income before taxes and the impact of our inability to recognize income tax benefits during the period as a result of losses sustained in certain tax jurisdictions where the future utilization of the losses are uncertain and by the recognition of tax expense associated with the transfer of certain intellectual property rights from U.S. to non-U.S. entities. The effective tax rate for the nine months ended September 30, 2007 is not calculable due to the pretax loss and tax charge reported for the period as a result of losses in tax jurisdictions for which we receive no tax benefit and the recognition of tax expense associated with the transfer of certain intellectual property rights from U.S. to non-U.S. entities.

Segment Results

The prior period amounts for operating income (loss) have been reclassified to conform to current period presentation, which reflect a change in the allocation of certain costs related to acquired businesses across the reportable operating segments versus solely in the region in which the acquired business was located when acquired. The following table presents revenues and operating income for the periods indicated by geographic region (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008 (As restated)	2007
Revenues:				
Americas	\$ 53,057	\$ 43,753	\$ 149,594	\$ 148,628
EMEA	45,360	30,928	129,591	96,222
Asia/Pacific	10,143	10,191	29,257	28,079
	<u>\$ 108,560</u>	<u>\$ 84,872</u>	<u>\$ 308,442</u>	<u>\$ 272,929</u>
Operating income (loss):				
Americas	\$ 5,807	\$ 911	\$ 8,576	\$ 15,869
EMEA	(1,314)	(8,402)	(2,660)	(20,267)
Asia/Pacific	(1,535)	(148)	(3,775)	1,852
	<u>\$ 2,958</u>	<u>\$ (7,639)</u>	<u>\$ 2,141</u>	<u>\$ (2,546)</u>

Revenues increased in the EMEA reportable operating segment by \$14.4 million, or 46.7%, and in the Americas reportable operating segment by \$9.3 million, or 21.3%, for the three months ended September 30, 2008 compared to the same period in 2007. The increase in these reportable operating segments was primarily driven by recognition of ILF revenues associated with new deals or term renewals signed during the period and customer “go-live” events. During the three months ended September 30, 2008, we also recognized \$4.1 million of revenues associated with certain Faster Payments implementations in the EMEA reportable operating segment. Revenues in the Asia/Pacific reportable operating segment remained consistent for the three months ended September 30, 2008 as compared to the same period in 2007.

Revenues increased in the EMEA reportable operating segment by \$33.4 million, or 34.7%, in the Asia/Pacific reportable operating segment by \$1.2 million, or 4.2%, and in the Americas reportable operating segment by \$1.0 million, or 0.6%, for the nine months ended September 30, 2008 compared to the same period in 2007. These results were driven primarily by the timing of license fee and capacity revenues within the reporting operating segments as well as a large multi-product implementation in

[Table of Contents](#)

the Americas reportable operating segment. Also, during the nine months ended September 30, 2008, we recognized \$17.5 million of revenues associated with certain Faster Payments implementations in the EMEA reportable operating segment.

Operating income increased in the Americas reportable operating segment by \$4.9 million for the three months ended September 30, 2008 compared to the same period in 2007. The EMEA reportable operating segment decreased its operating loss to \$1.3 million for the three months ended September 30, 2008 compared to an operating loss of \$8.4 million for the same period in 2007. The Asia/Pacific reportable segment operating loss increased to an operating loss of \$1.5 million for the three months ended September 30, 2008 compared to an operating loss of \$0.1 million for the same period in 2007. During the three months ended September 30, 2008, we recognized \$4.1 million of revenues associated with certain Faster Payments implementations in the EMEA reportable operating segment, partially offset by the recognition of \$0.7 million of deferred expenses. The changes in operating income (loss) are primarily driven by the timing of license fee and capacity revenues. Reportable operating segment results are also impacted by shared functions that are allocated based on a percentage of revenue such as Global Product Delivery and Development, Global Customer Operations and Global Product Management. Corporate overhead is allocated as a percentage of headcount and remains consistent period over period.

Operating income declined in the Americas reportable operating segment by \$7.3 million, or 46.0%, for the nine months ended September 30, 2008 compared to the same period in 2007. Operating loss in the EMEA reportable operating segment decreased by \$17.6 million, or 86.9%, for the nine months ended September 30, 2008 compared to the same period in 2007. The Asia/Pacific reportable operating segment had an operating loss of \$3.8 million for the nine months ended September 30, 2008 compared to operating income of \$1.9 million for the same period in 2007. During the nine months ended September 30, 2008, we recognized \$17.5 million of revenues associated with certain Faster Payments implementations in the EMEA reportable operating segment, partially offset by the recognition of \$1.6 million of deferred expenses. The changes in operating income (loss) are primarily driven by the timing of license fee and capacity revenues. Reportable operating segment results are also impacted by shared functions that are allocated based on a percentage of revenue such as Global Product Delivery and Development, Global Customer Operations and Global Product Management. Corporate overhead is allocated as a percentage of headcount and remains consistent period over period.

Liquidity and Capital Resources

As of September 30, 2008, our principal sources of liquidity consisted of \$94.3 million in cash and cash equivalents and up to \$75 million of unused borrowings under our revolving credit facility. The amount of unused borrowings actually available under the revolving credit facility varies in accordance with the terms of the agreement. We believe that the amount currently available along with our current cash balance provides sufficient liquidity. We are not currently dependent upon short-term funding, and the limited availability of credit in the market has not affected our revolving credit facility or our liquidity or materially impacted our funding costs. We had bank borrowings of \$75 million outstanding under our revolving credit facility as of September 30, 2008.

In December 2004, we announced that our board of directors approved a stock repurchase program authorizing us, from time to time as market and business conditions warrant, to acquire up to \$80.0 million of our common stock. In May 2006, our board of directors approved an increase of \$30.0 million to the stock repurchase program, bringing the total of the approved plan to \$110.0 million. In March 2007, our board of directors approved an increase of \$100 million to our current repurchase authorization, bringing the total authorization to \$210 million. Under the program to date, we have purchased approximately 6,049,484 shares for approximately \$154 million. The maximum remaining dollar value of shares authorized for purchase under the stock repurchase program was approximately \$56 million as of September 30, 2008. Purchases will be made from time to time as market and business conditions warrant, in open market, negotiated or block transactions, subject to applicable laws, rules and regulations.

We may also decide to use cash to acquire new products and services or enhance existing products and services through acquisitions of other companies, product lines, technologies and personnel, or through investments in other companies.

[Table of Contents](#)

Cash Flows

The following table sets forth summary cash flow data for the periods indicated. Please refer to this summary as you read our discussion of the sources and uses of cash in each period.

	Nine Months Ended September 30,	
	2008	2007
(amounts in thousands)		
Net cash provided by (used in):		
Operating activities	\$ 46,254	\$ 25,743
Investing activities	(14,351)	(12,128)

Net cash flows provided by operating activities for the nine months ended September 30, 2008 amounted to \$46.3 million as compared to \$25.7 million during the same period in 2007. The comparative period increase in net cash flows from operating activities of \$20.6 million was principally the result of the following items: \$40.6 million received from IBM primarily for prepayment of estimated incentives payments pursuant to the terms of the Alliance as amended and a net loss of \$2.4 million (as restated) for the nine months ended September 30, 2008 as compared to a net loss of \$11.8 million for the same period in 2007, and an increase of \$11.2 million in non cash expenses such as depreciation, amortization, change in fair value of interest rate swaps and deferred taxes in the nine months ended September 30, 2008 as compared to the same period in 2007. These items were partially offset by a decrease in deferred revenue of \$28.5 million (as restated), a \$10.7 million (as restated) decrease in accruals for other expenses and a \$1.4 million increase in accounts receivable during the nine months ended September 30, 2008.

Net cash flows used by investing activities totaled \$14.4 million in the nine months ended September 30, 2008 as compared to \$12.1 million used in investing activities during the same period in 2007. During the nine months ended September 30, 2008, we used cash of \$11.2 million to purchase software, property and equipment and \$4.3 million for costs related to fulfillment of the technical enablement milestones under the IBM Alliance. These uses of cash were partially offset in the nine months ended September 30, 2008, by \$1.2 million received from IBM for reimbursement of estimated capitalizable technical enablement milestones costs pursuant to the terms of the Alliance. During the nine months ended September 30, 2007, we used cash of \$3.8 million to purchase software, property and equipment. We also used cash of \$10.8 million for the acquisition of Visual Web and Stratasoftware during the nine months ended September 30, 2007. These uses of cash were partially offset in the nine months ended September 30, 2007, by \$2.5 million received from the sales of marketable securities.

Net cash flows used by financing activities totaled \$27.7 million in the nine months ended September 30, 2008 as compared to net cash flows used of \$44.2 million during the same period in 2007. In the nine months ended September 30, 2008 and 2007, we used cash of \$30.1 million and \$42.4 million, respectively, to purchase shares of our common stock under the stock repurchase program. We also made payments to third-party financial institutions, primarily related to debt and capital leases, totaling \$2.7 million and \$1.9 million during the nine months ended September 30, 2008 and 2007, respectively. During the nine months ended September 30, 2008, we received proceeds of \$3.7 million, including corresponding excess tax benefits, from the exercises of stock options and \$1.4 million for the issuance of common stock for a purchase under our Employee Stock Purchase Plan.

We also realized a \$6.9 million decrease in cash during the nine months ended September 30, 2008 compared to a \$1.5 million increase during the same period of 2007 related to foreign exchange rate variances.

We believe that our existing sources of liquidity, including cash on hand and cash provided by operating activities, will satisfy our projected liquidity requirements, which primarily consists of working capital requirements, for the foreseeable future.

Contractual Obligations and Commercial Commitments

We are unable to reasonably estimate the ultimate amount or timing of settlement of our reserves for income taxes under FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes (as amended). The liability for unrecognized tax benefits at September 30, 2008 is \$12.1 million.

[Table of Contents](#)

Lease Termination

During the nine months ended September 30, 2008, we terminated the lease for one of our facilities in Watford, England. Under the terms of the termination agreement, we paid a termination fee of approximately \$0.9 million that was recorded in general and administrative expenses in the accompanying consolidated statement of operations for the nine months ended September 30, 2008. Further under the termination agreement, we were relieved of our contractual obligations with respect to the restoration of facilities back to their original condition. As a result, we recognized a gain of approximately \$1.0 million related to the relief from this liability, which is also recorded in general and administrative expenses in the accompanying consolidated statements of operations. At September 30, 2008, December 31, 2007 and September 30, 2007, we had contractual obligations with respect to the restoration of leased facilities of \$1.5 million, \$2.5 million and \$2.6 million, respectively, recorded in other liabilities in the accompanying consolidated balance sheets.

Omaha Facility Lease

During the nine months ended September 30, 2008, our Omaha employees moved into a new facility. This facility has been leased under an operating lease with the initial term ending in 2028.

IBM IT Outsourcing Agreement

Under the Outsourcing Agreement with IBM, we will pay IBM for the IT services through a combination of fixed and variable charges subject to actual services needed, applicable service levels and statements of work. The total amount paid is subject to a minimum commitment as provided in the Outsourcing Agreement.

The contract minimums under the Outsourcing Agreement and minimum lease obligations for the Omaha facility as of September 30, 2008 are as follows (in thousands):

	Payments due by Period				
	Total	Less than 1 year	1 - 3 years	3 - 5 years	More than 5 years
IBM Outsourcing Agreement minimum commitment	\$ 51,158	\$ 7,970	\$ 16,335	\$ 15,818	\$ 11,035
Omaha facility (operating lease)	38,204	1,910	3,819	3,819	28,656
	<u>\$ 89,362</u>	<u>\$ 9,880</u>	<u>\$ 20,154</u>	<u>\$ 19,637</u>	<u>\$ 39,691</u>

Critical Accounting Estimates

The preparation of the consolidated financial statements requires that we make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We base our estimates on historical experience and other assumptions that we believe to be proper and reasonable under the circumstances. We continually evaluate the appropriateness of estimates and assumptions used in the preparation of our consolidated financial statements. Actual results could differ from those estimates.

The following key accounting policies are impacted significantly by judgments, assumptions and estimates used in the preparation of the consolidated financial statements. See Note 1, "Summary of Significant Accounting Policies" in the Notes to Consolidated Financial Statements in our Annual Report on Form 10-K for the fiscal year ended September 30, 2007, as amended by the Form 10-K/A filed on March 4, 2008, for a further discussion of revenue recognition and other significant accounting policies.

Revenue Recognition

For software license arrangements for which services rendered are not considered essential to the functionality of the software, we recognize revenue upon delivery, provided (1) there is persuasive evidence of an arrangement, (2) collection of the fee is considered probable, and (3) the fee is fixed or determinable. In most arrangements, because vendor-specific objective evidence of fair value does not exist for the license element, we use the residual method to determine the amount of revenue to be allocated

[Table of Contents](#)

to the license element. Under the residual method, the fair value of all undelivered elements, such as post contract customer support or other products or services, is deferred and subsequently recognized as the products are delivered or the services are performed, with the residual difference between the total arrangement fee and revenues allocated to undelivered elements being allocated to the delivered element. For software license arrangements in which we have concluded that collectibility issues may exist, revenue is recognized as cash is collected, provided all other conditions for revenue recognition have been met. In making the determination of collectibility, we consider the creditworthiness of the customer, economic conditions in the customer's industry and geographic location, and general economic conditions.

Our sales focus continues to shift from our more-established products to more complex arrangements involving multiple products inclusive of our BASE24-eps product and less-established (collectively referred to as "newer") products. As a result of this shift to newer products and more complex, multiple product arrangements, absent other factors, we initially experience an increase in deferred revenue and a corresponding decrease in current period revenue due to differences in the timing of revenue recognition for the respective products. Revenues from newer products are typically recognized upon acceptance or first production use by the customer whereas revenues from mature products, such as BASE24, are generally recognized upon delivery of the product, provided all other conditions for revenue recognition have been met. For those arrangements where revenues are being deferred and we determine that related direct and incremental costs are recoverable, such costs are deferred and subsequently expensed as the revenues are recognized. Newer products are continually evaluated by our management and product development personnel to determine when any such product meets specific internally defined product maturity criteria that would support its classification as a mature product. Evaluation criteria used in making this determination include successful demonstration of product features and functionality; standardization of sale, installation, and support functions; and customer acceptance at multiple production site installations, among others. A change in product classification (from newer to mature) would allow us to recognize revenues from new sales of the product upon delivery of the product rather than upon acceptance or first production use by the customer, resulting in earlier recognition of revenues from sales of that product, as well as related costs, provided all other revenue recognition criteria have been met. BASE24-eps was reclassified as a mature product as of October 1, 2006.

When a software license arrangement includes services to provide significant modification or customization of software, those services are not considered to be separable from the software. Accounting for such services delivered over time is referred to as contract accounting. Under contract accounting, we generally use the percentage-of-completion method. Under the percentage-of-completion method, we record revenue for the software license fee and services over the development and implementation period, with the percentage of completion generally measured by the percentage of labor hours incurred to-date to estimated total labor hours for each contract. Estimated total labor hours for each contract are based on the project scope, complexity, skill level requirements, and similarities with other projects of similar size and scope. For those contracts subject to contract accounting, estimates of total revenue and profitability under the contract consider amounts due under extended payment terms. For arrangements where we believe it is reasonably assured that no loss will be incurred under the arrangement and fair value for maintenance services does not exist, we use a zero margin approach of applying percentage-of-completion accounting until software customization services are completed. We exclude revenues due on extended payment terms from our current percentage-of-completion computation until such time that collection of the fees becomes probable.

We may execute more than one contract or agreement with a single customer. The separate contracts or agreements may be viewed as one multiple-element arrangement or separate arrangements for revenue recognition purposes. Judgment is required when evaluating the facts and circumstances related to each situation in order to reach appropriate conclusions regarding whether such arrangements are related or separate. Those conclusions can impact the timing of revenue recognition related to those arrangements.

Allowance for Doubtful Accounts

We maintain a general allowance for doubtful accounts based on our historical experience, along with additional customer-specific allowances. We regularly monitor credit risk exposures in our accounts receivable. In estimating the necessary level of our allowance for doubtful accounts, management considers the aging of our accounts receivable, the creditworthiness of our customers, economic conditions within the customer's industry, and general economic conditions, among other factors. Should any of these factors change, the estimates made by management would also change, which in turn would impact the level of our future provision for doubtful accounts. Specifically, if the financial condition of our customers were to deteriorate, affecting their ability to make payments, additional customer-specific provisions for doubtful accounts may be required. Also, should deterioration occur in general economic conditions, or within a particular industry or region in which we have a number of customers, additional provisions for doubtful accounts may be recorded to reserve for potential future losses. Any such additional provisions would reduce operating income in the periods in which they were recorded.

Intangible Assets and Goodwill

Our business acquisitions typically result in the recording of intangible assets, and the recorded values of those assets may become impaired in the future. As of September 30, 2008, December 31, 2007, and September 30, 2007, our intangible assets, net of accumulated amortization, were \$32.8 million, \$38.1 million, and \$39.7 million, respectively. The determination of the value of such intangible assets requires management to make estimates and assumptions that affect the consolidated financial statements. We assess potential impairments to intangible assets when there is evidence that events or changes in circumstances indicate that the carrying amount of an asset may not be recovered. Judgments regarding the existence of impairment indicators and future cash flows related to intangible assets are based on operational performance of our businesses, market conditions and other factors. Although there are inherent uncertainties in this assessment process, the estimates and assumptions used, including estimates of future cash flows, volumes, market penetration and discount rates, are consistent with our internal planning. If these estimates or their related assumptions change in the future, we may be required to record an impairment charge on all or a portion of our intangible assets. Furthermore, we cannot predict the occurrence of future impairment-triggering events nor the impact such events might have on our reported asset values. Future events could cause us to conclude that impairment indicators exist and that intangible assets associated with acquired businesses is impaired. Any resulting impairment loss could have an adverse impact on our results of operations. Other intangible assets are amortized using the straight-line method over periods ranging from 18 months to 12 years.

As of September 30, 2008, December 31, 2007, and September 30, 2007, our goodwill was \$204.6 million, \$206.8 million, and \$205.7 million, respectively. In accordance with SFAS No. 142, *Goodwill and Other Intangible Assets* (“SFAS No. 142”), we assess goodwill for impairment at least annually or when there is evidence that events or changes in circumstances indicate that the carrying amount of an asset may not be recovered. During this assessment, management relies on a number of factors, including operating results, business plans and anticipated future cash flows. When SFAS No. 142 was adopted we selected the end of our fiscal year (or September 30) as our annual impairment testing date. During the current year, we changed our fiscal year end from September 30 to December 31. As a result of the change in our fiscal year, we evaluated our annual goodwill impairment testing date and concluded to change our impairment testing date to October 1st versus the end of our new fiscal year. An October 1st testing date will allow us additional time to accurately complete our impairment testing process in order to incorporate the results in our annual financial statements and timely file those statements with the Securities Exchange Commission in accordance with our accelerated filing requirements.

Stock-Based Compensation

Effective October 1, 2005 we began recording compensation expense associated with stock-based awards in accordance with SFAS No. 123(R). We adopted the modified prospective transition method provided for under SFAS No. 123(R), and consequently have not retroactively adjusted results from prior periods. Under this transition method, compensation cost associated with stock-based awards includes (1) amortization related to the remaining unvested portion of stock-based awards granted prior to September 30, 2005, based on the grant date fair value estimated in accordance with the original provisions of SFAS No. 123; and (2) amortization related to stock-based awards granted subsequent to September 30, 2005, based on the grant date fair value estimated in accordance with the provisions of SFAS No. 123(R).

Under the provisions of SFAS No. 123(R), stock-based compensation cost for stock option awards is estimated at the grant date based on the award’s fair value as calculated by the Black-Scholes option-pricing model and is recognized as expense ratably over the requisite service period. We recognize stock-based compensation costs for only those shares that are expected to vest. The impact of forfeitures that may occur prior to vesting is estimated and considered in the amount of expense recognized. Forfeiture estimates will be revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. The Black-Scholes option-pricing model requires various highly judgmental assumptions including volatility and expected option life. If any of the assumptions used in the Black-Scholes model change significantly, stock-based compensation expense may differ materially for future awards from that recorded for existing awards.

We also have stock options outstanding that vest upon attainment by us of certain market conditions. In order to determine the grant date fair value of these stock options that vest based on the achievement of certain market conditions, a Monte Carlo simulation model is used to estimate (i) the probability that the performance goal will be achieved and (ii) the length of time required to attain the target market price.

Long term incentive program performance share awards (“LTIP Performance Shares”) were issued in fiscal 2007, fiscal 2006 and fiscal 2005. These awards are earned based on the achievement over a specified period of performance goals related to certain performance indicators. In order to determine compensation expense to be recorded for these LTIP Performance Shares, each

quarter management evaluates the probability that the target performance goals will be achieved, if at all, and the anticipated level of attainment.

During the nine months ended September 30, 2008, pursuant to our 2005 Incentive Plan, we granted restricted share awards (“RSAs”). These awards have requisite service periods of four years and vest in increments of 25% on the anniversary dates of the grants. Under each arrangement, stock is issued without direct cost to the employee. We estimate the fair value of the RSAs based upon the market price of our stock at the date of grant. The RSA grants provide for the payment of dividends on our common stock, if any, to the participant during the requisite service period (vesting period) and the participant has voting rights for each share of common stock.

Accounting for Income Taxes

Accounting for income taxes requires significant judgments in the development of estimates used in income tax calculations. Such judgments include, but are not limited to, the likelihood we would realize the benefits of net operating loss carryforwards and/or foreign tax credit carryforwards, the adequacy of valuation allowances, and the rates used to measure transactions with foreign subsidiaries. As part of the process of preparing our consolidated financial statements, we are required to estimate our income taxes in each of the jurisdictions in which the Company operates. The judgments and estimates used are subject to challenge by domestic and foreign taxing authorities. It is possible that either domestic or foreign taxing authorities could challenge those judgments and estimates and draw conclusions that would cause us to incur tax liabilities in excess of, or realize benefits less than, those currently recorded. In addition, changes in the geographical mix or estimated amount of annual pretax income could impact our overall effective tax rate.

To the extent recovery of deferred tax assets is not likely, we record a valuation allowance to reduce our deferred tax assets to the amount that is more likely than not to be realized. Although we have considered future taxable income along with prudent and feasible tax planning strategies in assessing the need for a valuation allowance, if we should determine that we would not be able to realize all or part of our deferred tax assets in the future, an adjustment to deferred tax assets would be charged to income in the period any such determination was made. Likewise, in the event we are able to realize our deferred tax assets in the future in excess of the net recorded amount, an adjustment to deferred tax assets would increase income in the period any such determination was made.

In July 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes - an interpretation of FASB Statement No. 109* ("FIN 48"). The Company adopted the provision of FIN 48 effective October 1, 2007. FIN 48 prescribes a recognition threshold and measurement attribute for the recognition and measurement of tax positions taken or expected to be taken in a tax return and also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition.

Recently Issued Accounting Standards

In December 2007, the FASB issued SFAS No. 141(R), *Business Combinations* ("SFAS 141(R)"), which replaces SFAS 141. SFAS 141(R) establishes principles and requirements for how an acquirer in a business combination recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any controlling interest; recognizes and measures the goodwill acquired in the business combination or a gain from a bargain purchase; and determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. SFAS 141(R) is to be applied prospectively to business combinations for which the acquisition date is on or after an entity's fiscal year that begins after December 15, 2008. We will assess the impact of SFAS 141(R) if and when a future acquisition occurs.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements - an amendment of ARB No. 51* ("SFAS 160"). SFAS 160 establishes new accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. Specifically, this statement requires the recognition of a noncontrolling interest (minority interest) as equity in the consolidated financial statements and separate from the parent's equity. The amount of net income attributable to the noncontrolling interest will be included in consolidated net income on the face of the income statement. SFAS 160 clarifies that changes in a parent's ownership interest in a subsidiary that do not result in deconsolidation are equity transactions if the parent retains its controlling financial interest. In addition, this statement requires that a parent recognize a gain or loss in net income when a subsidiary is deconsolidated. Such gain or loss will be measured using the fair value of the noncontrolling equity investment on the deconsolidation date. SFAS 160 also includes expanded disclosure requirements regarding the interests of the parent and its noncontrolling interest. SFAS 160 is effective for fiscal years, and

[Table of Contents](#)

interim periods within those fiscal years, beginning on or after December 15, 2008. Earlier adoption is prohibited. We are currently evaluating the impact, if any, the adoption of SFAS 160 will have on our consolidated financial statements.

In February 2008, the FASB issued FASB Staff Position ("FSP") Financial Accounting Standard ("FAS") 157-2, *Effective Date of FASB Statement No. 157*. FSP FAS 157-2 delays the effective date of SFAS No. 157 from 2008 to 2009 for all nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually).

On March 19, 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities*, ("SFAS 161"). SFAS 161 amends FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, ("SFAS 133") and was issued in response to concerns and criticisms about the lack of adequate disclosure of derivative instruments and hedging activities. SFAS 161 requires; (i) qualitative disclosures regarding the objectives and strategies for using derivative instruments and engaging in hedging activities in the context of an entity's overall risk exposure, (ii) quantitative disclosures in tabular format of the fair values of derivative instruments and their gains and losses, and (iii) disclosures about credit-risk related contingent features in derivative instruments. SFAS 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, but early application is encouraged. We are currently evaluating the impact, if any, the adoption of SFAS 161 will have on our consolidated financial statements.

In May 2008, the FASB issued SFAS No. 162, *The Hierarchy of Generally Accepted Accounting Principles*. SFAS 162 identifies the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental entities that are presented in conformity with generally accepted accounting principles in the United States. It is effective 60 days following the SEC's approval of the Public Company Accounting Oversight Board amendments to AU Section 411, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles*. The adoption of this statement is not expected to have a material effect on our financial statements.

In June 2008, the FASB issued FSP EITF 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities* (FSP EITF 03-6-1). FSP EITF 03-6-1 clarified that all outstanding unvested share-based payment awards that contain rights to nonforfeitable dividends participate in undistributed earnings with common shareholders. Awards of this nature are considered participating securities and the two-class method of computing basic and diluted earnings per share must be applied. FSP EITF 03-6-1 is effective for fiscal years beginning after December 15, 2008. The implementation of this standard will not have a material impact on our consolidated financial position and results of operations.

In October 2008, the FASB issued Staff Position No. FAS 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset is Not Active* (FSP 157-3). FSP 157-3 clarifies the application of SFAS 157, which the Company adopted as of January 1, 2008, in cases where a market is not active. We have considered the guidance provided by FSP 157-3 in its determination of estimated fair values of financial assets as of September 30, 2008, and the impact was not material.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Excluding the impact of changes in interest rates and the uncertainty in the global financial markets, there have been no material changes to our market risk for the nine months ended September 30, 2008. We conduct business in all parts of the world and are thereby exposed to market risks related to fluctuations in foreign currency exchange rates. The U.S. dollar is the single largest currency in which our revenue contracts are denominated. Thus, any decline in the value of local foreign currencies against the U.S. dollar results in our products and services being more expensive to a potential foreign customer, and in those instances where our goods and services have already been sold, may result in the receivables being more difficult to collect. Additionally, any decline in the value of the U.S. dollar in jurisdictions where the revenue contracts are denominated in U.S. dollars and operating expenses are incurred in local currency will

have an unfavorable impact to operating margins. We at times enter into revenue contracts that are denominated in the country's local currency, principally in Australia, Canada, the United Kingdom and other European countries. This practice serves as a natural hedge to finance the local currency expenses incurred in those locations. We have not entered into any foreign currency hedging transactions. We do not purchase or hold any derivative financial instruments for the purpose of speculation or arbitrage.

The primary objective of our cash investment policy is to preserve principal without significantly increasing risk. Based on our cash investments and interest rates on these investments at September 30, 2008, and if we maintained this level of similar cash investments for a period of one year, a hypothetical ten percent increase or decrease in interest rates would increase or decrease interest income by approximately \$0.2 million annually.

[Table of Contents](#)

During the year ended September 30, 2007, we entered into two interest rate swaps with a commercial bank whereby we pay a fixed rate of 5.375% and 4.90% and receive a floating rate indexed to the 3-month LIBOR from the counterparty on a notional amount of \$75 million and \$50 million, respectively. As of September 30, 2008, the fair value liability of the interest rate swaps was approximately \$5.1 million, of which \$3.1 million and \$2.0 million was included in other current liabilities and other noncurrent liabilities, respectively, on the consolidated balance sheet. The potential additional loss in fair value liability of the interest rate swaps resulting from a hypothetical 10 percent adverse change in interest rates was approximately \$0.9 million at September 30, 2008. Because our interest rate swaps do not qualify for hedge accounting, changes in the fair value of the interest rate swaps are recognized in the consolidated statements of operations, along with the related income tax effects.

Subsequent to September 30, 2008, events in the global credit markets have impacted the expectation of near-term variable borrowing rates. As a result, we have experienced an unfavorable impact to the fair value liability of our interest rate swaps. The fair value liability has increased approximately \$0.7 million from a balance of \$5.1 million as of September 30, 2008 to \$5.8 million as of October 31, 2008.

Effective January 1, 2008, we adopted the provisions of SFAS No. 157, *Fair Value Measurements* ("SFAS 157"), for financial assets and financial liabilities. SFAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements.

SFAS 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. SFAS 157 establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

- Level 1 Inputs - Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.
- Level 2 Inputs - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (such as interest rates, volatilities, prepayment speeds, credit risks, etc.) or inputs that are derived principally from or corroborated by market data by correlation or other means.
- Level 3 Inputs - Unobservable inputs for determining the fair values of assets or liabilities that reflect an entity's own assumptions about the assumptions that market participants would use in pricing the assets or liabilities.

Derivatives. Derivatives are reported at fair value utilizing Level 2 inputs. We utilize valuation models prepared by a third-party with observable market data inputs to estimate fair value of its interest rate swaps.

Commons Stock Warrants. Common stock warrants are reported at fair value utilizing Level 2 inputs. The Company utilized a valuation model prepared by a third-party with observable market data inputs to estimate fair value of the common stock warrants.

Item 4. CONTROLS AND PROCEDURES

Our management, under the supervision of and with the participation of our Principal Executive Officer and Principal Financial Officer, performed an evaluation of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act")) as of the end of the period covered by this report, September 30, 2008. Based upon this evaluation, our Principal Executive Officer and Principal Financial Officer concluded that our disclosure controls and procedures were not effective as of that date.

As of September 30, 2007, material weaknesses in internal control over financial reporting related to recognition of revenue and income taxes existed. A material weakness is defined in Public Company Accounting Oversight Board Auditing Standard No. 5 as a deficiency, or a combination of deficiencies in internal control over financial reporting such that there is a reasonable possibility that a material misstatement would not be prevented or detected on a timely basis. In connection with our overall assessment of internal control over financial reporting, we have evaluated the effectiveness of our internal controls as of September 30, 2008 and have concluded that the material weaknesses related to accounting for recognition of revenue and accounting for income taxes were not remediated as of September 30, 2008.

[Table of Contents](#)

In connection with the filing of this Form 10-Q/A, we have reevaluated our disclosure control and procedures as of September 30, 2008. In addition to the material weaknesses described above, we concluded that the following material weakness in internal control over financial reporting existed as of September 30, 2008:

The Company did not maintain effective policies and procedures related to its accounting for software implementation service and license arrangements in the Asia Pacific region. Specifically, the Company did not have adequate corporate oversight, sufficient local US GAAP knowledge

and experience, and sufficient accounting and communication processes in place to ensure proper revenue recognition for service and related license revenue. As a result of this material weakness, the Company restated its March 31, 2008 financial statements to reflect the correction of a material misstatement related to service and licensing revenue and related costs for a software implementation services project that should have been deferred until additional project milestones were achieved.

Changes in Internal Control Over Financial Reporting

Remediation plans established and initiated by management in fiscal year 2007 have been implemented. The Company has hired adequate qualified staff with the necessary knowledge, experience and training to support complex accounting requirements and maintain effective internal control over financial reporting.

While we have implemented our remediation activities, we believe it will take multiple quarters of effective application of the control activities from the time of remediation, including adequate testing of such control activities, in order for us to revise our conclusion regarding the effectiveness of our internal controls over financial reporting.

As of September 1, 2008, the Company outsourced its internal information technology services to IBM. As part of the agreement, IBM will provide ACI with global infrastructure services including management of ACI's mainframe, storage and related server platforms, data network monitoring and management, and end-user support services. Control activities for these functions were performed by IBM as of September 1, 2008. There were no other changes in our internal controls over financial reporting during the quarter ended September 30, 2008 that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

Restatement

Subsequently, during the first quarter of 2009, we identified a deficiency within our internal control framework. We determined that our previously reported consolidated financial statements for the nine months ended September 30, 2008 required restatement. This Form 10-Q/A restates the September 30, 2008 interim financial statements for the correction of the error. Because the error resulted in the restatement of previously issued financial statements, we determined the deficiency within our internal control framework to be a material weakness.

Refer to Note 2 to the consolidated financial statements for further information regarding this restatement.

PART II – OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

From time to time, we are involved in various litigation matters arising in the ordinary course of our business. Other than as described below, we are not currently a party to any legal proceedings, the adverse outcome of which, individually or in the aggregate, we believe would be likely to have a material adverse effect on our financial condition or results of operations.

Class Action Litigation. In November 2002, two class action complaints were filed in the U.S. District Court for the District of Nebraska (the "Court") against us and certain individuals alleging violations of Sections 10(b) and 20(a) of the Securities Exchange Act of 1934 and Rule 10b-5 thereunder. Pursuant to a Court order, the two complaints were consolidated as *Desert Orchid Partners v. Transaction Systems Architects, Inc., et al., with Genesee County Employees' Retirement System* designated as lead plaintiff. The Second Amended Consolidated Class Action Complaint previously alleged that during the purported class period, we and the named defendants misrepresented our historical financial condition, results of operations and our future prospects, and failed to disclose facts that could have indicated an impending decline in our revenues. That complaint also alleged that, prior to August 2002, the purported truth regarding our financial condition had not been disclosed to the market. On May 31, 2006, lead plaintiff filed a Third Amended Complaint ("Third Complaint"). The Third Complaint alleged the same misrepresentations as described above, while simultaneously alleging that the purported truth about our financial condition was being disclosed throughout that time, commencing in April 1999. The Third Complaint sought unspecified damages, interest, fees, and costs.

On June 14, 2006, we and the individual defendants filed a motion to dismiss the Third Complaint pursuant to Rules 8 and 12 of the Federal Rules of Civil Procedure. Lead plaintiff opposed the motion. Prior to any ruling on the motion to dismiss, on November 7, 2006, the parties entered into a Stipulation of Settlement for purposes of settling all of the claims in the Class Action Litigation, with no admissions of wrongdoing by us or any individual defendant. The settlement provides for an aggregate cash payment of \$24.5 million of which, net of insurance, we contributed approximately \$8.5 million. The settlement was approved by the Court on March 2, 2007 and the Court ordered the case dismissed with prejudice against us and the individual defendants.

On March 27, 2007, James J. Hayes, a class member, filed a notice of appeal with the United States Court of Appeals for the Eighth Circuit appealing the Court's order. On August 13, 2008, the Court of Appeals affirmed the judgment of the district court dismissing the case. Thereafter, Mr. Hays petitioned the Court of Appeals for a rehearing en banc, which petition was denied on September 22, 2008.

Item 1A. RISK FACTORS

The following risk factors should be read in conjunction with the risk factors disclosed in Item 1A of the Company's Form 10-K for the fiscal year ended September 30, 2007 and Form 10-Q for the three months ended March 31, 2008. Additional risks and uncertainties, including risks and uncertainties not presently known to us, or that we currently deem immaterial, could also have an adverse effect on our business, financial condition and/or results of operations.

The financial crisis affecting the banking system and financial markets and the current global economic conditions could reduce the demand for our products and services or otherwise adversely impact our cash flows, operating results and financial condition.

The current financial crisis, a declining real estate market in the United States, concerns about inflation, changes in bank credit quality in the United States or abroad, extreme capital and credit market volatility, higher unemployment and declining business and consumer confidence have precipitated an economic slowdown and lead to fears of a possible recession. The global electronic payments industry and the banking and financial services industries depend heavily

upon the overall level of consumer, business and government spending. For the foreseeable future, we expect to derive most of our revenue from products and services we provide to the banking and financial services industries. The current economic conditions could result in a decrease in consumers' use of banking services and financial service providers and the implementation by banks and related financial service providers of cost reduction measures which could result in significant decreases in the demand for our products and services and adversely affect our operating results. In addition, in response to the financial crisis, President Bush signed the Emergency Economic Stabilization Act of 2008 (the "EESA") into law. There can be no assurance as to what impact the enactment of the EESA or future legislative and regulatory actions will have on the banking and financial services industries.

Moreover, to the degree that the financial crisis and the volatility in the credit markets makes it more difficult for our customers to maintain sufficient liquidity to meet their operating needs or obtain financing, customers may be unable to timely meet their payment obligations to us and we may experience greater difficulties in accounts receivable collection, increases in bad debt write-offs and additions to reserves in our receivables portfolio which could have a material adverse impact on our cash flows, operating results and financial condition.

Our current credit facility contains restrictions and other financial covenants that limit our flexibility in operating our business.

Our credit facility contains customary affirmative and negative covenants for credit facilities of this type that limit our ability to engage in specified types of transactions. These covenants limit our ability, and the ability of our subsidiaries, to, among other things: pay dividends on, repurchase or make distributions in respect of our capital stock or make other restricted payments; make certain investments; sell certain assets; create liens; incur additional indebtedness or issue certain preferred shares; consolidate, merge, sell or otherwise dispose of all or substantially all of our assets; and enter into certain transactions with our affiliates. Our credit facility also requires us to meet certain quarterly financial tests, including a maximum leverage ratio and a minimum interest coverage ratio. Our credit facility includes customary events of default, including, but not limited to, failure to pay principal or interest, breach of covenants or representations and warranties, cross-default to other indebtedness, judgment default and insolvency. If an event of default occurs under the credit facility, the lenders will be entitled to take various actions, including, but not limited to, demanding payment for all amounts outstanding. If adverse global economic conditions persist or worsen, we could experience decreased revenues from our operations attributable to reduced demand for our products and services and as a result, we could fail to satisfy the financial and other restrictive covenants to which we are subject under our existing credit facility.

The volatility and disruption of the capital and credit markets and adverse changes in the global economy may negatively impact our liquidity and our ability to access financing.

While we intend to finance our operations and growth of our business with existing cash and cash flow from operations, if adverse global economic conditions persist or worsen, we could experience a decrease in cash from operations attributable to reduced demand for our products and services and as a result, we may need to borrow additional amounts under our existing credit facility or we may require additional financing our continued operation and growth. However, due to the existing uncertainty in the capital and credit markets and the impact of the current economic crisis on our operating results and financial conditions, the amount of available unused borrowings under our existing credit facility may be insufficient to meet our needs and/or our access to capital outside of our existing credit facility may not be available on terms acceptable to us or at all.

[Table of Contents](#)

Our announced restructuring and efficiency efforts as part of the implementation of our strategic plan may not achieve the expected efficiencies and cost savings which could affect our results of operations and financial condition.

In August 2008 we announced the implementation of our strategic plan and our expectations related to certain cost take-outs during 2008 and 2009 to be achieved primarily through a reduction in the work force, reallocation of headcount to different geographies and consolidation of non-core products and facilities. While we expect our cost saving initiatives to result in significant cost savings throughout our organization, our estimated savings are based on several assumptions that may prove to be inaccurate, and as a result we cannot assure you that we will realize these cost savings. The failure to achieve our estimated cost savings, or a significant delay in our achievement of the expected benefits, could negatively affect our financial condition and results of operations. Factors that could cause actual results to differ materially from our expectations with regard to our announced restructuring include:

- timing and execution of plans and programs that may be subject to local labor law requirements, including consultation with appropriate work councils;
- changes in assumptions related to severance and postretirement costs;
- risks associated with litigation for wrongful termination;
- new business initiatives and changes in product roadmaps and development efforts;
- changes in employment levels and turnover rates; and
- changes in product demand and the business environment.

While we have and will continue to implement these strategies, there can be no assurance that we will be able to do so successfully or that we will realize the projected benefits of these and other cost saving plans. If we are unable to realize these anticipated cost reductions, our financial health may be adversely affected. Moreover, our continued implementation of cost saving plans may result in the continued diversion of management time and resources and the disruption of our operations, services to customers and performance.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Issuer Purchases of Equity Securities

The Company did not repurchase any of its common stock during the three months ended September 30, 2008.

In fiscal 2005, we announced that our board of directors approved a stock repurchase program authorizing us, from time to time as market and business conditions warrant, to acquire up to \$80 million of our common stock, and that we intend to use existing cash and cash equivalents to fund these repurchases. In May 2006, our board of directors approved an increase of \$30 million to the stock repurchase program, bringing the total of the approved program to \$110 million. In March 2007, our board of directors approved an increase of \$100 million to its current repurchase authorization, bringing the total authorization to \$210 million, of which approximately \$56 million remains available. In June 2007, we implemented this previously announced increase to our share repurchase program. There is no guarantee as to the exact number of shares that will be repurchased by us. Repurchased shares are returned to the status of authorized but unissued shares of common stock. In March 2005, our board of directors approved a plan under Rule 10b5-1 of the Securities Exchange Act of

EXHIBIT INDEX

Exhibit No.		Description
10.1	*	Form of Nonqualified Stock Option Agreement – Employee for the Company’s 2005 Equity and Performance Incentive Plan, as amended.

* Denotes exhibit that constitutes a management contract or compensatory plan or arrangement.

** This certification is not deemed “filed” for purposes of Section 18 of the Securities Exchange Act of 1934, or otherwise subject to the liability of that section. Such certification will not be deemed to be incorporated by reference into any filing under the Securities Act of 1933 or the Securities Exchange Act of 1934, except to the extent that the Company specifically incorporates it by reference.

November 7, 2008

The Board of Directors and Shareholders
ACI Worldwide, Inc.

Ladies and Gentlemen:

We have been furnished with a copy of the quarterly report on Form 10-Q of ACI Worldwide, Inc. (the Company) for the three months ended September 30, 2008, and have read the Company's statements contained in Note 1 to the consolidated financial statements included therein. As stated in Note 1, the Company changed its method of applying Statement of Financial Accounting Standards No. 142, *Goodwill and Other Intangible Assets*, such that the annual impairment testing date relating to goodwill was changed from the end of its fiscal year (previously September 30) to October 1. As a result of the change in its fiscal year, the Company evaluated its annual goodwill impairment testing date and concluded to change the impairment testing date to October 1 versus the end of its new fiscal year (December 31). The Company states that the newly adopted accounting principle is preferable in the circumstances because an October 1 testing date will allow the Company additional time to accurately complete its impairment testing process in order to incorporate the results in its annual financial statements and timely file those statements with the Securities and Exchange Commission in accordance with its accelerated filing requirements. In accordance with your request, we have reviewed and discussed with Company officials the circumstances and business judgment and planning upon which the decision to make this change in the method of accounting was based.

We have not audited any financial statements of the Company as of any date or for any period subsequent to September 30, 2007, nor have we audited the information set forth in the aforementioned Note 1 to the consolidated financial statements; accordingly, we do not express an opinion concerning the factual information contained therein.

With regard to the aforementioned accounting change, authoritative criteria have not been established for evaluating the preferability of one acceptable method of accounting over another acceptable method. However, for purposes of the Company's compliance with the requirements of the Securities and Exchange Commission, we are furnishing this letter.

Based on our review and discussion, with reliance on management's business judgment and planning, we concur that the newly adopted method of accounting is preferable in the Company's circumstances.

Very truly yours,

/s/ KPMG LLP

Omaha, Nebraska

CERTIFICATION OF PRINCIPAL EXECUTIVE OFFICER

I, Philip G. Heasley, certify that:

1. I have reviewed this quarterly report on Form 10-Q/A of ACI Worldwide, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonable likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
